

SACOG Board of Directors

Item #05-12-23
Receive/File

December 8, 2005

Televising of Board Meetings

Issue: Whether or not to televise the Board meetings.

Recommendation: None, this item is for you to receive and file only.

Discussion: At the SACOG Board of Director's July meeting, John Deeter from ECOS requested that the SACOG Board meetings be broadcast on cable television. Staff has solicited advice from vendors and have found that in order to purchase the equipment and software necessary to televise the meeting, it would cost approximately \$200,000 during the first year with the cost substantially decreasing for future years. There are insufficient funds in this fiscal year's budget to acquire this equipment and staff recommends that the purchase be revisited at some point in the future. In the meantime, we will start making audio versions of the meetings available on our website.

Approved by:
