

SACOG Board of Directors

March 9, 2006

Request for Allocation of State Transportation Improvement Program Funds

Issue: SACOG authorization to proceed with allocation of Regional Improvement Program (RIP) funds from the State Transportation Improvement Program (STIP) for the projects included in Attachment A.

Recommendation: The Transportation Committee recommends that the SACOG Board of Directors approve the allocation requests in Attachment A, as contained in the adopted Regional Transportation Improvement Program.

Committee Action/Discussion: SACOG Policies for RIP-Funded Local Projects require local allocation requests for RIP funds to be approved by the SACOG Board prior to California Transportation Commission (CTC) action. Staff is submitting these requests for the Board's action at this time to position the projects to receive allocations as soon as the California Transportation Commission resumes allocating funds either in June or July 2006. Given the Commission's on-again, off-again funding of STIP projects of the recent past, staff wants to ensure that ready SACOG projects receive funds while the funds last.
