Bicycle Trip Planner Update

Issue: Bicycle Trip Planner update. SACOG staff still needs data from jurisdictions.

Recommendation: None; this item is for information and discussion only.

Discussion: Staff has developed an integrated street network and bicycle network file based on each of our members' Geographic Information System (GIS) street files. We are currently working to incorporate new information developed for the Sacramento County Bicycle Master Plan. Over the next two months, these integrated bicycle route and street GIS files will be given back to each jurisdiction for them to maintain locally.

For the application development, staff has been working on creating a bicycle trip planner using the best data and technology available. The trip planner combines the technologies of Google maps and ESRI's Arcserver. SACOG staff will provide a demonstration at the meeting.
