

## Anticipated Sustainable Improvements as part of Economic Recovery Road Rehabilitation

SACOG staff surveyed project sponsors from the Road Rehabilitation Candidate List in response to direction from the Government Relations & Public Affairs Committee. Staff asked sponsors if they anticipate doing any of the work types below as part of anticipated Road Rehabilitation funded by Surface Transportation Program (STP) funds.

Road rehabilitation is sometimes thought as an improvement for automobile users only; however it can also benefit other modes. Road rehabilitation can be done to include:

- Transit Improvements
- Americans with Disabilities Act (ADA) Improvements
- Bicycle Improvements
- Pedestrian Improvements
- Complete Streets (Designing, operating, and maintaining a road network to enable safe access for all users, including pedestrians, bicyclists, motorists and transit riders of all ages and abilities.)
