Adopt Bicycle/Pedestrian Master Plan Update

Issue: A minor update to the Bicycle & Pedestrian Master Plan has been completed to inform fall programming activities that will include a new round of the Regional Bicycle and Pedestrian Funding Program.

Recommendation: The Transportation Committee recommends that the Board approve the Master Plan update.

Committee Action/Discussion: The Regional Bicycle and Pedestrian Funding Program (Funding Program) is expected to begin this fall, and only projects in the SACOG Regional Bicycle, Pedestrian and Trails Master Plan (Master Plan) are eligible to receive funding. The last Master Plan update was made in July 2007. To ensure that local jurisdictions are allowed to submit their highest priority bicycle and pedestrian projects for funding, staff has completed a minor update to the Master Plan in which local agencies were able to submit new or altered projects for inclusion in the Master Plan project list. A working group comprised of representatives from the Bicycle/Pedestrian Advisory Committee reviewed the new projects, which are shaded on the attached project list for your review. The project list (Appendix B) is the only section with substantive edits or new information. However, other minor updates have been made to the Plan and are identified below:

- MTP2035 data replaces 2025 MTP data in sections 1.2 (land use), 1.3 (public interest and participation), 2.2 (MTP2035), 2.3 (Blueprint growth principles), and 2.4 (linking land use and transportation).
- Other miscellaneous updates are in the following sections: 3 (list of regional plans), 7.3 (economic benefits to bicycle communities), Tables A.5 (injury and fatal collision data), Appendix D (transit operator information), and Appendix E (local plan web links).

While inclusion in the Master Plan is required for consideration in the Funding Program, project inclusion does not in itself guarantee funding. The Bicycle and Pedestrian Funding Program Guidelines offer detail on the funding eligibility requirements and explain that the Funding Program supports projects and programs in Sacramento, Sutter, Yolo, and Yuba counties. Projects that apply for the funding program will be required to provide detailed cost analyses and other information. Although the Master Plan includes projects in all six SACOG counties, El Dorado and Placer counties fund bicycle and pedestrian projects independently through their respective Regional Transportation Planning Agencies (RTPAs).

The SACOG Bicycle and Pedestrian Advisory Committee approved the Master Plan update at the July 23, 2009, meeting. With Board approval of the updated Master Plan, staff can proceed with a call for projects for the Funding Program. If you would like a copy of the entire Master Plan, please notify staff or visit <http://www.sacog.org/calendar/2009/08/>.
