

Climate & Air Quality Committee

Item #09-09-3
Information

August 26, 2009

Update on SACOG Climate Change Website

Issue: SACOG is creating a website to highlight climate change issues around the region.

Recommendation: None; this item is for information only.

Discussion: Staff has begun the process of writing pieces and programming language for a climate change website for the Sacramento region. The site will include updates on what projects are happening around the region, and issues SACOG is involved in directly. The intention is to have the climate change website be a starting point for local staff and interested parties when searching on regionally related climate change issues. Any suggestions on possible topics, projects, or issues the committee has can be implemented into the structure of the site.
