Regional Planning Partnership

October 15, 2009

Hospital Expansion

Issue: Rideout Hospital in Marysville is planning a major expansion, to nearly double the number of beds, and Mr. William Appleby is concerned that the project Environmental Impact Report (EIR) failed to adequately address bicycle and pedestrian access to the hospital.

Recommendation: None; this is for discussion.

Discussion: Mr. Appleby will present additional information about his concerns on the new hospital expansion. Specifically, he is concerned about two blocks on 1st and F Streets, from the SR70 Bridge to the hospital, as they do not have sidewalks and bike lanes. Mr. Appleby will show photos and seek input on solutions.
