## **Conformity Determination for Amendment #6 to SACOG's 2009/12 Metropolitan Transportation Improvement Program**

---

Amendment #6 to the 2009/12 MTIP is relying on a previous regional emission analysis for its approval by Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). The following documentation has been prepared in accordance with FHWA's checklist for reliance on a previous regional emission analysis, dated January 31, 2006.

The applicable pollutants for the 2009/12 MTIP include ROG and NO<sub>x</sub> for the Sacramento Ozone Nonattainment Area, Carbon Monoxide (CO) for the CO Maintenance Area, and Particulate Matter (PM-10) for the PM-10 Moderate Nonattainment Area (§ 93.102).

The SACOG Board of Directors adopted Amendment #6 at its March 19, 2009 meeting. The date of the previous conformity finding being relied upon was approved by the SACOG Board of Directors at its March 20, 2008, meeting (§ 93.104 (b, c)).

The 2009/12 MTIP is fiscally constrained consistent with 40 CFR 450 (§ 93.108).

The conformity determination that Amendment #6 relies upon was prepared in accordance with the conformity requirements as published in Title 40 Code of Federal Regulations, Part 93 (§ 93.109).

The conformity tests for the Sacramento region vary by pollutant. The emissions budget test for ROG and NO<sub>x</sub> must be equal to or less than the budgets established in the Sacramento Regional Nonattainment Area 8-Hour Ozone Rate-Of-Progress State Implementation Plan (ROP/SIP) for the Sacramento ozone nonattainment area. The test for Carbon Monoxide (CO) must show that CO emissions are less than the CO maintenance budgets established in the 2004 Revision to the California State Implementation Plan for Carbon Monoxide, dated January 30, 2006. The conformity test for Particulate Matter (PM-10) is a Build vs. No-build test for PM-10 emissions. Under this test, PM-10 emissions must be less in the "Action" scenario than the "Baseline" scenario in order to pass the PM-10 conformity test. Table 2 (attached) shows the ROG, NO<sub>x</sub> and CO emissions budgets tests and Tables 3 and 4 show the PM-10 emission budget tests that were used to conform the March 20, 2008 conformity submittal that this MTIP relies upon (§ 93.109 (c-k)).

The emission estimates developed for this conformity determination were based on the latest population and employment projections for the Sacramento and Yuba/Sutter areas that were adopted by the SACOG Board of Directors on September 20, 2007 (§ 93.110).

One of the critical inputs into determining emissions associated with Amendment #6, which this conformity determination relies upon, is the selection of which emissions factors to use. For purposes of this conformity determination, EMFAC 2002 was used, as provided to SACOG by the California Air Resources Board (CARB). A list of the assumptions used in developing this conformity determination can be found in Table 4. On February 1, 2007, the Federal Highway Administration (FHWA) sent a letter to all of the Metropolitan Planning Organizations in California and Caltrans Districts indicating that, after August 1, 2007, they would not be able to start any new transportation conformity determinations that require a new regional emissions analysis, unless the analysis incorporates more recent vehicle data consistent with the latest planning assumptions requirements in the conformity rule (40 CFR 93.110). The letter indicated that updated vehicle data was available in EMFAC2007, which was released to the public in November 2006. The letter indicated that FHWA, the Federal Transit Administration (FTA), and EPA were providing agencies with a 6-month transition period, beginning on February 1, 2007, before the new vehicle fleet data was required in conformity determinations. Consistent with the Transportation Conformity requirements found in the Federal Clean Air Act, Section 176(c) [42 U.S.C. 7506(c)], and Title 40, Code of Federal Regulations, Part 93, Subpart A, new vehicle registration data must be used when it is available at the start of new conformity analyses. Since newer vehicle data was available but was not included in the older version of EMFAC, EMFAC2002 has not been used in any new regional emissions analyses that were started since August 1, 2007 (Federal Register, January 18, 2008, Volume 73, #13, pp.3464-3467). The vehicle

registration data used in this conformity determination is from EMFAC 2002. The initial modeling performed for the previous regional emissions analysis performed for the MTP for 2035 conformity determination that this conformity determination relies upon began on June 4, 2007 (§ 93.111).

Public review of this document is part of the conformity consultation process as required under section 93.105 (a) (2), 93.105 (c) (1), and 93.105 (e) and is consistent with the public involvement procedures under 23 CFR 450 (§ 93.112) and the SACOG Public Participation Plan.

This air quality conformity determination includes interagency consultation and a public review period to give all affected parties an opportunity to comment. SACOG initiated interagency consultation by discussing the conformity approach with jurisdictional agencies and providing an opportunity for review and comment on the draft conformity determination prior to releasing the draft analysis for public review. Following that step, the Draft Amendment #6 and the Conformity Determination circulated March 10, 2009, for public review through March 18. After the public hearing at the March 5 Transportation Committee meeting, the Board voted to approve a revised version of Amendment #6 and the Conformity Determination at its March 19 meeting.

In previous conformity determinations, SACOG had documented that all TCMs have been implemented; nevertheless, staff is in the process of updating the status report to assure federal agencies that SACOG is in compliance with this requirement. Pursuant to 40 CFR 93.113, SACOG has made a commitment to conduct an ongoing monitoring process to document the timely implementation of all transportation control measures (TCMs) in approved state implementation plans (SIPs). In its 1987 report, the EPA noted that “in general, most of the agencies that committed to carrying out measures under the 1982 Air Quality Plan (AQP) have fulfilled those commitments and, in many cases, have taken actions which go beyond their 1982 Plan commitments.” No additional TCMs have been added to SIPs in the region since the 1982 Plan. If any TCMs are found to be still ongoing or not fully implemented, those will be documented and addressed. SACOG is currently in the process of updating the status of TCMs from the 1982 SIP, and is working closely with FHWA and EPA to compile this documentation. (§ 93.113).

As documented in Tables 1, 2 and 3 (attached) the conformity analysis performed on Amendment #15 to the 2007/10 MTIP and the Metropolitan Transportation Plan for 2035 (MTP) is consistent with the analysis performed for the Plan, in accordance with 23 CFR 450.324 (f) (2) (§ 93.114), § 93.118 (a-e) and § 93.119 for areas with SIP budgets and § 93.119 (g) dealing with areas without applicable SIP budgets.

Once the conformity analysis years for each pollutant (ROG, NO<sub>x</sub>, CO and PM-10) have been selected, SACOG uses its SACMET travel demand model to generate daily vehicle miles traveled (VMT) and total trips for each analysis year in question using population and employment assumptions, as shown in Table 1 attached. The outputs from the transportation model are then inputted into a PC-based version of EMFAC2002, which is used to generate emissions. The list of projects for each analysis year is defined by the Metropolitan Transportation Plan (MTP) and Metropolitan Transportation Improvement Program (MTIP) for the first years of the Plan and by the MTP for all future conformity analysis years (§ 93.119 (h, i)).

As stated previously, Amendment #6 relies on a previous emissions analysis that was prepared for the MTP that was approved by the SACOG Board of Directors on March 20, 2008 and was approved by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) on May 16, 2008 (§ 93.122 (g)).

1) MTIP Inventories include emission forecasts for northern Solano County.

2) Local adjustments for 2008 include state and local measures (SECAT) that were not included in the baseline modeling (see Appendix D of the 2005 ROP/SIP for additional information).

Nonattainment area for PM-10 is Sacramento County only. The Build vs No-Build Test is used for PM-10 conformity findings because ARB has not established any PM-10 budgets for Sacramento County.

The 2008 emissions are carried out to the 4th decimal because the difference in VMT between build and no-build was only 5,335 miles.

TABLE 4

**Summary of Latest Planning Assumptions  
that were used to develop the MTP 2035  
Conformity Determination**

<p>On May 24, 2007, SACOG's RPP approved a list of assumptions to use in developing the air quality conformity determinations associated with the MTP 2035, Amendment #15 to the 2007/10 MTIP and the new 2009/12 MTIP.</p>	
Assumption 1	<p>The SACOG Board of Directors adopted a new set of population, housing, and employment projections for the years 2013, 2018 and 2035 at its March 17, 2007 meeting to be used for all future conformity determinations. The SACOG Board previously adopted population and employment numbers for the year 2035 at its December 14, 2006 meeting, replacing earlier projections dating from December 16, 2004. Projections for all other milestone years will be interpolated using the 2013, 2018 and 2035 numbers, plus the base year (2005) datasets.</p>
Assumption 2	<p>EMFAC 2002 will be used to develop emission estimates for the conformity determinations associated with the adoption of the MTP 2035 and amendment of the 2007/10 MTIP. The modeling required for this regional emissions analysis will begin prior to August 1, 2007 (it began on June 4, 2007). The emission budgets used in the conformity determinations are from the ROP SIP.</p>
Assumption 3	<p>SACOG will use the most recent emission control factors supplied by the California Air Resources Board (CARB) for use in any future conformity determinations.</p>
Assumption 4	<p>SACOG will claim emission reduction credits from the implementation of Congestion Mitigation and Air Quality (CMAQ) projects upon proper documentation.</p>
Assumption 5	<p>SACOG will continue to incorporate emissions estimates for that part of Solano County within the Sacramento federal ozone nonattainment area in all future conformity determinations as agreed to under SACOG's existing Memorandum of Understanding (MOU) with the Metropolitan Transportation Commission (MTC).</p>
Assumption 6	<p>SACOG will claim emission reduction credits from the implementation of the Sacramento Emergency Clean Air and Transportation (SECAT) program upon proper documentation.</p>
