Subject: Re: Fw: Draft MTP 2035 & EIR public comment period

Hello Matt,

12-1

El Dorado County Department of Transportation (EDCDOT) has reviewed the draft EIR for the MTP 2035, and have no comments as it is a program EIR that is very general in nature and refers all mitigation to the project specific level within the relative jurisdiction.

12-2

Regarding the specific EDCDOT projects included in the MTP 2035, this list of projects was submitted a year ago. We are now in the process of updating our 5-year CIP through 2011/12, and have identified some projects with completion year and cost changes. These projects and changes are highlighted in yellow on the attached spreadsheet (updated 20DEC2007), which was extracted from Appendix A2 of the MTP 2035 Final Draft Project List (also attached).

At the top of this list are 5 projects that were not on the A2 list. Four of the five projects were new federally funded projects that were obligated in 2007. The first project on the list is Phase 2 of an existing US 50 interchange project that has been split into two phases.

Thank you for this opportunity to comment on the MTP 2035. It's a mammoth project that you have done an outstanding job of overseeing.

If you have any questions, please contact me.

Happy Holidays!
