41-1 [I am in support of the MTP as issued in draft. One area of concern is there is a lack of information regarding the proposed new commuter rail line between Placer and Yolo counties. I had hoped to see a Light Rail extension proposed for south Placer County, but, if the commuter rail route/schedule is adequate, Light Rail might be something that could wait or be replaced by the commuter rail.

41-2 [In general, I am in favor of promoting infill development and urban redevelopment as opposed to greenfield, suburban-style development, and any funds that can be shifted from automobile transportation to public transit (especially rail) aid that shift.
