Subject: Re: Draft MTP2035 & EIR public comment period

Lacey,

7-1
My comments on the 2035 date time for the City of Wheatland Project Yuba County "Hopper to Gst." and "Spenceville Road To Highway 65" Date 2035. My question is where do we get help to bring this project Date way up, to like 2008 or 2009???? These two roads are Rural urban collectors from Beale AFB housing area to Highway 65, and From Highway 65 to Highway and 99. These roads are continuously being used for truckers from one Highway to another Highway, and for deliveries at Beale AFB and to transport children to School by Buses to Wheatland School District. The residents of the Spenceville area and residents from Beale AFB use these two roads to get back and forth to work and shopping at the Galleria and Movies, Dining out, and to get to downtown Sacramento for shopping and entertainment and also to the Sacramento Airport. These two roads are shattering and AB under asphalt has collapsed and they are becoming Safety Hazards. I always thought the State and Yuba county wants to Keep Beale AFB off the closure list. I believe it doesn't look good on all are parts when we can't even catch out for the safety of the children at Beale AFB. But the City of Wheatland can not afford to pave these two roads that are continuously transporting the residents of Beale and their children to school on a daily routine. But we can give 33 million dollars to Watt avenue or Folsom Blvd. and these two projects would be less than 1 million dollars. I don't understand this when the Citizens of Wheatland pay their taxes like any body else in the State, I understand less population, less taxes collected but our needs are know different than any other City in the State, AND WE NEED HELP WITH THESE TWO PROJECTS ASP. PLEASE DIRECT US IN THE RIGHT DIRECTION.

Thank you,

Larry I. Panteloglew Sr..
City of Wheatland
Public Works Director
