

STARNET Systems Integration Procurement Information

Last updated **October 30, 2007**.

This document contains logistical and progress information related to the procurement of systems integration services for the Sacramento Transportation Area Network (STARNET) project administered by the Sacramento Area Council of Governments (SACOG).

This document will remain posted at the SACOG RFP page for as long as information remains relevant. This document may be updated at any time without notice. Those interested in the procurement process should check this document regularly. Please check this document for information before contacting SACOG, or their technical assistance contractor for the STARNET project, Siemens ITS.

The Request for Proposals (RFP) was issued November 1, 2007, and is available from the RFP page at the Sacramento Area Council of Governments (SACOG) web site (<http://www.sacog.org/rfp/>). The STARNET project documents referenced in the RFP are available at the SACOG intelligent transportation systems web page (<http://www.sacog.org/websites/starnet/index.cfm>). If you are unable to obtain the RFP or reference documents, contact Warren Tighe at warren.tighe@siemens.com, or 925-787-3251. Other questions should be asked at the pre-proposal conference.

A phone bridge has been established for those unable to attend the pre-proposal conference in person. The phone bridge will be available approximately 10 minutes prior to the start time of the meeting (see the RFP), and those using the phone are requested to connect prior to the meeting start time. Please do not call from a noisy location or using a phone with a poor connection. Please mute your phone when not speaking. For phones without a mute control, press *6 to mute, and #6 to unmute.

To participate by phone call **1-888-666-9664**, and when prompted, enter code **925 787 3251 #**. Please say your name when prompted. Once you have joined the conference, please announce yourself, your company name, and any others sharing your call, at the first opportunity. Note that the conference proceedings will not be recorded and there is no assurance that the phone bridge will enable all participants to be heard clearly.
