

## What is ATRC?

The Active Transportation Resource Center's (ATRC) mission is to assist California's communities, tribal areas, and schools with resources, technical assistance, and training to help implement active transportation projects awarded through California's Active Transportation Program (ATP).

California Department of Public Health's role within the ATRC is to provide training and resources for ATP *Non-Infrastructure* projects and other interested parties.

## ATRC has a New Website: [www.caatpresources.org](http://www.caatpresources.org)

We are excited to announce the NEW ATRC WEBSITE! It offers a clean, updated look and feel; and links together services offered by all of the ATRC providers

### Some Resources You'll Find on the Website:

- Links to walking and biking curricula, toolkits and other resources from across the country
- Guides for supporting active transportation in California's rural and tribal communities
- Recordings of past trainings covering a variety of active transportation topics
- Much, much more

## Upcoming Opportunities

On April 26<sup>th</sup> (tomorrow!) at 10 a.m., the ATRC will convene the second of a two-part [Walking School Bus webinar series](#). In January, the ATRC worked with the Safe Routes to School National Partnership on a webinar to unveil the new toolkit, [Step by Step: How to Create a Walking School Bus at Your School](#), to help communities plan and organize walking school busses as a means to support safe and active transportation options for students and address barriers that may prevent students from walking to school. The April training will feature two California communities who will share their experiences on walking school bus implementation. [Register for this training today.](#)

In May, the ATRC plans to host a webinar on Safe Routes to School (SRTS) Evaluation Resources and Best Practices.

In June, the ATRC will host a statewide teleconference featuring a panel discussion on regional Metropolitan Planning Organization efforts to support non-infrastructure active transportation strategies.

The ATRC is currently planning to begin offering *non-infrastructure* focused training workshops to interested parties across the state. Scope is to be determined. Keep your eyes and ears open for more information in the coming months.

## Stay Connected

Make sure you're on our [mailing list](#) to receive registration information to the exciting learning opportunities mentioned above, and many more.
