The purpose of the Partnership is to assist SACOG with its transportation and air quality planning and programming processes, with an emphasis on technical issues, by providing consultation with a broad range of public and private constituencies. It also provides a forum for local agencies in the region's transportation and land use industry to contribute to the policy-making and fund programming activities of SACOG, and to improve coordination within the region.

The Regional Planning Partnership (RPP) consists of the five local air districts, representatives of the U.S. Environmental Protection Agency (EPA), California Air Resources Board (ARB), Federal Highway Administration (FHWA), Federal Transit Administration (FTA), and state and local transportation agencies. The RPP meets quarterly or as needed. Each RPP meeting is open to the public and is currently being held virtually.

3. Metropolitan Transportation Plan/Sustainable Communities Strategy (“Blueprint”): Update on Plan Development and Related Topics (Binu Abraham; 10 minutes)

- Summary of formal action and information items to the SACOG Board of Directors and the Land Use & Natural Resources (LUNR), Transportation, and Policy & Innovation (P&I) committees last quarter.
- Look ahead to this quarter.
 - SACOG is undertaking a scenario planning effort, referred to as Pathways, as part of the process for the 2024 Blueprint. Pathways will provide the analysis and metrics that will serve as a learning tool for unpacking the many complex and intersecting issues facing the region over the next three decades. The three Pathways are intended to allow for comparison of a wide range of futures, focusing primarily on how land use pattern and transportation system investments/programs interact to contribute to or detract from the Triple Bottom Line goals endorsed by the SACOG board in the Policy Framework for the 2024 Blueprint. Each of the pathways will be stress tested using the population, housing, and employment growth projections the SACOG board adopted in February as part of the Policy Framework to learn how emerging technologies and policy decisions might affect the outcomes of each pathway.
