The purpose of the Partnership is to assist SACOG with its transportation and air quality planning and programming processes, with an emphasis on technical issues, by providing consultation with a broad range of public and private constituencies. It also provides a forum for local agencies in the region’s transportation and land use industry to contribute to the policy-making and fund programming activities of SACOG, and to improve coordination within the region.

The Regional Planning Partnership (RPP) consists of the five local air districts, representatives of the U.S. Environmental Protection Agency (EPA), California Air Resources Board (ARB), Federal Highway Administration (FHWA), Federal Transit Administration (FTA), and state and local transportation agencies. The RPP meets bimonthly. Each RPP meeting is open to the public and held at the SACOG offices.
