

SACOG Board of Directors

August 8, 2013

Support for Safe Streets Act of 2013 (H.R. 2468)

Issue: Should SACOG take a position to support H.R. 2468, which would require metropolitan planning organizations (MPOs) and states to take all users into account when developing transportation projects?

Recommendation: The Government Relations & Public Affairs Committee recommends by majority vote (Hanley Oppose) support for H.R. 2468, as it would improve transportation choices and is consistent with SACOG's adopted policies in the Metropolitan Transportation Plan/Sustainable Communities Strategy for 2035 (MTP/SCS).

Committee Action/Discussion: H.R. 2468 would require MPOs and states to develop and implement complete streets policies for all federally funded projects. It defines "complete streets principles" as federal, state, local, or regional level transportation laws, policies, or principles which ensure that the safety and convenience of all users of a transportation system, including pedestrians, bicyclists, public transit users, children, older individuals, motorists, freight vehicles, and individuals with disabilities, are accommodated in all phases of project planning and development.

This bill would only apply to new projects that have not yet been planned. States and MPOs could request exemptions if: (1) affected roadways prohibit specified users by law from using them, (2) the cost of a compliance project would be excessively disproportionate to the need, or (3) the population, employment densities, traffic volumes, or level of transit service around a roadway is so low that the expected roadway users will not include pedestrians, public transportation, freight vehicles, or bicyclists.

This bill is consistent with legislation passed in California in 2008 (AB 1358), which requires the development of complete streets policies, and the MTP/SCS, which identifies complete streets design as an implementation strategy and includes complete streets principles, projects and programs.

H.R. 2468 is sponsored by Congresswoman Doris Matsui, and co-sponsored by Congressman Frank LoBiondo (R-New Jersey), Congresswoman Dina Titus (D-Nevada), and Congressman David Joyce (R-Ohio). This is the third attempt to pass federal complete streets legislation. H.R. 2468 is identical to legislation introduced in 2011 (H.R. 1780) which was similar to 2009 legislation (H.R. 1443), both of which SACOG supported.

H.R. 2468 is supported by: AARP, American Planning Association, American Public Transportation Association, America Society of Landscape Architects, Easter Seals, League of American Bicyclists, National Association of Realtors, Safe Routes to School National Partnership, and Transportation for America. On June 21, H.R. 2468 was referred to the House Transportation and Infrastructure Committee's Subcommittee on Highways and Transit. A copy of H.R. 2468 is attached.

AUTHOR: Matsui D

VERSION: Introduced

VERSION DATE: 06/20/2013

[H.R. 2468 Introduced in House (IH)]

113th CONGRESS

1st Session

H. R. 2468

To ensure the safety of all users of the transportation system, including pedestrians, bicyclists, transit users, children, older individuals, and individuals with disabilities, as they travel on and across federally funded streets and highways.

IN THE HOUSE OF REPRESENTATIVES

June 20, 2013

Ms. Matsui (for herself and Mr. Joyce) introduced the following bill; which was referred to the Committee on Transportation and Infrastructure

A BILL

To ensure the safety of all users of the transportation system, including pedestrians, bicyclists, transit users, children, older individuals, and individuals with disabilities, as they travel on and across federally funded streets and highways.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Safe Streets Act of 2013".

SEC. 2. DEFINITIONS.

In this Act:

(1) COMPLETE STREET.—The term "complete street" means a roadway that safely accommodates all travelers, particularly public transit users, bicyclists, pedestrians (including individuals of all ages and individuals with mobility, sensory, neurological, or hidden disabilities), motorists and freight vehicles, to enable all travelers to use the roadway safely and efficiently.

(2) COMPLETE STREETS POLICY; COMPLETE STREETS PRINCIPLE.—The terms "complete streets policy" and "complete streets principle" mean a transportation law, policy, or principle at the local, State, regional, or Federal level that ensures—

(A) the safe and adequate accommodation, in all phases of project planning and development, of all users of the transportation system, including pedestrians, bicyclists, public transit users, children, older individuals, individuals with disabilities, motorists, and freight vehicles; and

(B) the consideration of the safety and convenience of all users in all phases of project planning and development.

(3) LOCAL JURISDICTION.—The term "local jurisdiction" means any unit of local government.

(4) METROPOLITAN PLANNING ORGANIZATION.—The term "metropolitan planning organization" has the meaning given the term in section 134 (b) of title 23, United States Code.

(5) ROADWAY.—The term "roadway" means—

(A) the defined Federal functional classification roadway system; and

(B) each bridge structure providing a connection for such a roadway system.

(6) SECRETARY.—The term "Secretary" means the Secretary of Transportation.

(7) SENIOR MANAGER.—The term "senior manager" means—

(A) the director of a State department of transportation (or a designee);

(B) the director of a metropolitan planning organization (or a designee); and

(C) the director of a regional, county, or city transportation agency that is primarily responsible for planning and approval of transportation projects (or a designee).

(8) TRANSPORTATION IMPROVEMENT PROGRAM.—The term "transportation improvement program" has the meaning given the term "TIP" in section 134 (b) of title 23, United States Code.

SEC. 3. COMPLETE STREETS POLICY.

(a) LAW OR POLICY.—Not later than October 1 of the fiscal year that begins 2 years after the date of enactment of this Act each State and metropolitan planning organization shall have in effect—

(1) in the case of a State—

(A) a law requiring that, beginning on the effective date of the State law, all transportation projects in the State shall accommodate the safety and convenience of all users in accordance with complete streets principles; or

(B) an explicit State department policy that, beginning on the effective date of the policy, all transportation projects in the State shall accommodate the safety and convenience of all users in accordance with complete streets principles; and

(2) in the case of a metropolitan planning organization, an explicit statement of policy that, beginning on the effective date of the policy, all transportation projects under the jurisdiction of the metropolitan planning organization shall accommodate the safety and convenience of all users in accordance with complete streets principles.

(b) INCLUSIONS.—

(1) IN GENERAL.—A law or policy described in subsection (a) shall—

(A) apply to each federally funded project of each State department of transportation or metropolitan planning organization transportation improvement program;

(B) include a statement that each project under the transportation improvement program makes streets or affected rights-of-way accessible to the expected users of that facility, of all ages and abilities, including pedestrians, bicyclists, transit vehicles and users, freight vehicles, and motorists;

(C) except as provided in paragraph (2), apply to new road construction and road modification projects, including design, planning, construction, reconstruction, rehabilitation, maintenance, and operations, for the entire right-of-way;

(D) indicate that improvements for the safe and convenient travel by pedestrians or bicyclists of all ages and abilities on or across streets shall be fully assessed, considered, and documented as a routine element of pavement resurfacing projects;

(E) delineate a clear procedure by which transportation improvement projects may be exempted from complying with complete streets principles, which shall require—

(i) approval by the appropriate senior manager, in accordance with subsection (d)(2); and

(ii) documentation, with supporting data, that indicates the basis for such an exemption;

(F) comply with up-to-date design standards, particularly standards relating to providing access for individuals with disabilities;

(G) require that complete streets principles be applied in due consideration of the urban, suburban, or rural context in which a project is located;

(H) include a list of performance standards with measurable outcomes to ensure that the transportation improvement program adheres to complete streets principles; and

(I) directs agency staff to create an implementation plan.

(2) EXCEPTION.—A law or policy described in subsection (a) shall not apply to a new road construction or modification project for which, as of the effective date of the law or policy, at least 30 percent of the design phase is completed.

(c) EXEMPTION REQUIREMENTS AND PROCEDURES.—A law or policy described in subsection (a) shall allow for a project-specific exemption from an applicable complete streets policy if—

(1)(A) an affected roadway prohibits, by law, use of the roadway by specified users, in which case a greater effort shall be made to accommodate those specified users elsewhere, including on roadways that cross or otherwise intersect with the affected roadway;

(B) the cost to the exempted project in achieving compliance with the applicable complete streets policy would be excessively disproportionate (as defined in the 2001 Department of Transportation Guidance on Accommodating Bicycle and Pedestrian Travel), as compared to the need or probable use of a particular complete street; or

(C) the existing and planned population, employment densities, traffic volumes, or level of transit service around a particular roadway is so low, that the expected users of the roadway will not include pedestrians, public transportation, freight vehicles, or bicyclists; and

(2) the project-specific exemption is approved by—

(A) a senior manager of the metropolitan planning organization that approved the transportation improvement program containing the exempted project;

(B) a senior manager of the relevant State department of transportation; or

(C) in the case of a project for which neither the metropolitan planning organization nor the State department of transportation is the agency with primary transportation planning authority, a senior manager of the regional, county, or city agency responsible for planning and approval of the project.

(d) INTEGRATION.—Each State department of transportation and metropolitan planning organization implementing a complete streets policy shall incorporate complete streets principles into all aspects of the transportation project development, programming, and delivery process, including project planning and identification, scoping procedures, design approvals, design manuals, and performance measures.

(e) REPORTS.—

(1) IN GENERAL.—Each State department of transportation shall submit to the Secretary a report describing the implementation by the State of measures to achieve compliance with the requirements of this section, at such time, in such manner, and containing such information as the Secretary may require.

(2) DETERMINATION BY SECRETARY.—On receipt of a report under paragraph (1), the Secretary shall determine whether the applicable State has achieved compliance with the requirements of this section.

SEC. 4. CERTIFICATION.

(a) IN GENERAL.—Not later than 1 year after the enactment of this Act, the Secretary shall establish a method of evaluating compliance by State departments of transportation and metropolitan planning organizations with the requirements of this Act, including a requirement that each State department of transportation and metropolitan planning organization shall submit to the Secretary a report describing—

(1) each complete streets policy adopted by the State department of transportation or metropolitan planning organization;

(2) the means of implementation by the State department of transportation or metropolitan planning organization of the complete streets policy; and

(3) the process of providing an exemption from the complete streets policy of the State department of transportation or metropolitan planning organization.

(b) REPORT.—Not later than 3 years after the date of enactment of this Act, the Secretary shall submit to Congress a report describing—

- (1) the method established under subsection (a);
- (2) the status of activities for adoption and implementation by State departments of transportation and metropolitan planning organizations of complete streets policies;
- (3) the tools and resources provided by the Secretary to State departments of transportation and metropolitan planning organizations to assist with that adoption and implementation; and
- (4) other measures carried out by the Secretary to encourage the adoption of complete streets policies by local jurisdictions.

SEC. 5. ACCESSIBILITY STANDARDS.

(a) FINAL STANDARDS.—Not later than 1 year after the date of enactment of this Act, the Architectural and Transportation Barriers Compliance Board established by section 502(a)(1) of the Rehabilitation Act of 1973 (29 U.S.C. 792 (a)(1)) shall promulgate final standards for accessibility of new construction and alteration of pedestrian facilities for public rights-of-way.

(b) TEMPORARY STANDARDS.—During the period beginning on the date of enactment of this Act and ending on the date on which the Architectural and Transportation Barriers Compliance Board promulgates final standards under subsection (a), a State or metropolitan planning organization shall apply to public rights-of-way—

- (1) the standards for accessible transportation facilities contained in section 37.9 of title 49, Code of Federal Regulations (as in effect on the date of enactment of this Act); or
- (2) if the standards referred to in paragraph (1) do not address, or are inapplicable to, an affected public right-of-way, the revised draft guidelines for accessible public rights-of-way of the Architectural and Transportation Barriers Compliance Board dated November 23, 2005.

SEC. 6. RESEARCH, TECHNICAL GUIDANCE, AND IMPLEMENTATION ASSISTANCE.

(a) RESEARCH.—

(1) IN GENERAL.—The Secretary shall conduct research regarding complete streets to assist States, metropolitan planning organizations, and local jurisdictions in developing, adopting, and implementing plans, projects, procedures, policies, and training programs that comply with complete streets principles.

(2) PARTICIPATION.—The Secretary shall solicit participation in the research program under paragraph (1) by—

- (A) the American Association of State Highway and Transportation Officials;
- (B) the Institute of Transportation Engineers;
- (C) the American Public Transportation Association;
- (D) the American Planning Association;
- (E) the National Association of Regional Councils;
- (F) the Association of Metropolitan Planning Organizations;
- (G) the Insurance Institute for Highway Safety;
- (H) the American Society of Landscape Architects;
- (I) representatives of transportation safety, disability, motoring, bicycling, walking, transit user, aging, and air quality organizations; and
- (J) other affected communities.

(3) REQUIREMENTS.—The research under paragraph (1) shall—

- (A) be based on the applicable statement of complete streets research needs of the Transportation Research Board, as described in TR Circular E110; and
- (B) seek to develop new areas of inquiry, in addition to that statement.

(b) BENCHMARKS AND GUIDANCE.—

(1) IN GENERAL.—The research conducted under subsection (a) shall be designed to result in the establishment of benchmarks and the provision of practical guidance on methods of effectively implementing complete streets policies and complete streets principles that will accommodate all users along a facility or corridor, including vehicles, pedestrians, bicyclists, and transit users.

(2) FOCUS.—The benchmarks and guidance under paragraph (1) shall—

- (A) focus on modifying scoping, design, and construction procedures to more effectively combine particular methods of use into integrated facilities that meet the needs of each method in an appropriate balance; and
- (B) indicate the expected operational and safety performance of alternative approaches to facility design.

(c) DATA COLLECTION.—The Secretary shall collaborate with the Bureau of Transportation Statistics, the Federal Transit Administration, and appropriate committees of the Transportation Research Board—

- (1) to collect data regarding a baseline nonmotorized and transit use survey to be integrated into the National Household Travel Survey; and
- (2) to develop a survey tool for use by State departments of transportation in identifying the multimodal capacity of State and local roadways.

(d) TECHNICAL GUIDANCE.—

(1) REPORT.—Not later than 15 months after the date of enactment of this Act, the Secretary shall prepare and make available to all States, metropolitan planning organizations, and local jurisdictions a report that describes the best practices by which transportation agencies throughout the United States have implemented complete streets principles in accordance with, or in anticipation of, the requirements of this Act.

(2) TOPICS FOR EMPHASIS.—In preparing the report under paragraph (1), the Secretary shall place particular emphasis on the following topics:

- (A) Procedures for identifying the needs of users of all ages and abilities of a particular roadway.
- (B) Procedures for identifying the types and designs of facilities needed to serve each class of users.
- (C) Safety and other benefits provided by the implementation of complete streets principles.

(D) Common barriers to the implementation of complete streets principles.

(E) Procedures for overcoming the most common barriers to the implementation of complete streets principles.

(F) Procedures for identifying the costs associated with the implementation of complete streets principles.

(G) Procedures for maximizing local cooperation in the introduction and implementation of complete streets

principles.

(H) Procedures for assessing and modifying the facilities and operational characteristics of existing roadways to improve consistency with complete streets principles.
