Caltrans District 3 Complete Streets Inventory

Issue: What is Caltrans District 3's Complete Streets inventory?

Recommendation: None; for information only.

Discussion: Caltrans District 3 Transportation Planning staff recently completed a first draft Complete Streets Inventory for the State Highways in the 11 District counties. The Inventory focused on cities, towns, and unincorporated places with activity centers or clustered residential units that generate more frequent walking and bicycling trips. The Inventory contains descriptions of existing facilities, links to Google Street View of selected segments, and priority lists of segments for further review. Planners from District 3 will be presenting their methodologies and initial data.
