

Item #4

Bicycle & Pedestrian Advisory Committee

Free Technical Assistance for Healthy Communities and Active Design

WALKSacramento has received two grants. One is from the Centers for Disease Control and American Planning Association. It is intended to create sustainable change around how municipalities plan communities in order to promote regular physical activity. The second is a grant from the Strategic Growth Council to do similar work throughout the SACOG region.

WALKSacramento seeks to connect with planners to provide this free technical assistance in the form of:

- Education and training workshops
- Policy development assistance
- Consulting with developers to improve projects at the outset
- Identifying opportunities within ongoing projects to leverage public health resources and providing insight on ways to further advance healthy community goals through best practices.
