Subject: Proposed project for the Community Design Grant Category #3
2nd Street Infill Project

Dear Mr. Chew,

The City of Galt would like to propose the 2nd Street Sidewalk Infill Project for the SACOG Community Design Grant Category #3 (Non-competitive) application. The project limit is from D Street to F Street, and the project scope of work is infill concrete sidewalk, curb, and gutter and ADA improvements. Sidewalk gaps on adjacent streets would be bid alternates to fully take advantage of the grant funding. Other minor improvements / modifications such as fence relocation, reset of mailboxes, and storm drain inlets will be included as part of the project. All work will be within existing City right-of-way.

The proposed improvements would enable pedestrians and school children to fully utilize this path to access Valley Oaks Elementary School and Harvey Park. The attached aerial and photos within the corridor highlight the barriers that will be removed by these improvements.

These improvements support the Blueprint policies of providing transportation choices. The installation of sidewalks will allow students to safely walk to Valley Oaks Elementary School and provides safe pedestrian connections between the neighborhood and Harvey Park; thus reducing vehicular trips.

If you have any questions please don’t hesitate to call / email, (209) 366-7273 / gowens@ci.galt.ca.us.

Sincerely,

Gwen Owens
Public Works Deputy Director
