Update on Air Resources Board Scoping Plan

Issue: The Air Resources Board (ARB) is set to release a draft of the Scoping Plan to address goals set in Assembly Bill 32 (AB 32).

Recommendation: None, this is for information only.

Discussion: AB 32 required ARB to develop a Scoping Plan that describes the approach California will take to achieve the goal of reducing greenhouse gas emissions to 1990 levels by 2020. The Scoping Plan, first considered by ARB in 2008, must be updated every five years, and is in the process of being updated now. A discussion draft of the Scoping Plan update was released in October of 2013, but contained little detail. The Draft Proposed Plan and Environmental Analysis is scheduled for release in late January, 2014.

SACOG staff will brief the committee on the released draft Scoping Plan.
