Conformity Determination for the 2011/14 Metropolitan Transportation Improvement Program and Amendment #3 to SACOG's 2035 Metropolitan Transportation Plan

Summary

The results of the emissions analysis show that the 2011/14 MTIP and Amendment #3 to the 2035 MTP meet the emissions conformity tests based on the Transportation Conformity requirements found in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, Code of Federal Regulations (CFR), Part 93, Subpart A for the federally-designated nonattainment areas as noted in the following section.

Introduction

The following is the air quality conformity determination on the 2011/14 Metropolitan Transportation Improvement Program (MTIP) and Amendment #3 to the 2035 Metropolitan Transportation Plan (MTP) for the following stated designation areas:

- 8-Hour Ozone (including the ROG and NO_x precursors) Severe Nonattainment Area, including
 - The Sacramento Metropolitan Area (Sacramento, Yolo and portions of El Dorado, Placer, Sutter and Solano Counties), and
 - The Sutter Buttes Area (Sutter County)
- Carbon Monoxide (CO) Maintenance Area (Sacramento, Yolo and a portion of Placer Counties),
- Particulate Matter (PM₁₀) Moderate Nonattainment Area (Sacramento County), and the

On December 14, 2009 portions of five counties in the SACOG region were designated as nonattainment for the 2006 24-Hour PM_{2.5} standard. Nonattainment Areas include the Sacramento Area (Sacramento and portions of Yolo, Sutter, Placer and El Dorado Counties) and the Yuba City-Marysville Area (portions of Sutter and Yuba Counties). SACOG has one year to implement conformity from the date of designation of the PM 2.5 standard. SACOG will be taking a separate PM 2.5 conformity document through its adoption process in October/November. This standalone document will be submitted to FHWA concurrent with this (September) conformity document and in whole will provide a complete conformity determination for all identified designations as related to the 2011/14 MTIP and current MTP.

The SACOG Board of Directors is scheduled to act on this conformity determination at its September 9, 2010 meeting. For this conformity determination, the conformity analysis performed for the MTIP is consistent with the analysis performed for the MTP. The attached air quality conformity determination has been prepared in accordance with the conformity requirements as found in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, CFR, Part 93, Subpart A (93.109).

Background:

Federal regulations require that the Sacramento Area Council of Governments (SACOG) prepare air quality conformity determinations for its transportation plans and programs. The purpose of the conformity determination is to ensure that SACOG's plans and programs "conform" to all applicable federal air quality requirements. Based on guidance found in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, Code of Federal Regulations, Part 93, Subpart A, conformity determinations must be based upon the most recent estimates of on-road vehicle-based emissions. The emissions estimates must also be based upon the most recent population, employment, travel and congestion forecasts from SACOG, acting as the federally designated metropolitan planning organization (MPO) for the Sacramento region.

SACOG has developed an emissions conformity procedure based on the modeling requirements contained in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, CFR, Part 93, Subpart A. These regulations require us to develop a series of forecasting model runs for the Sacramento air quality planning areas, using our SACSIM travel demand model, whenever we prepare a conformity determination. This

model uses estimates of population, employment and travel patterns for 2005, as the "Base Year," and future estimates of these same parameters for a series of future years. The future years are designated as "milestone" or "horizon" years for certain types of pollutant emissions, under U.S. Environmental Protection Agency (EPA) regulations. The travel demand models are used to estimate daily vehicle miles traveled (VMT) in five-mile-per-hour increments for each model run. The total number of trips for each model run is also generated. Daily VMT and total trips from each model run are then used as inputs to our vehicle-emissions forecasting model, EMFAC2007. The EMFAC2007 model forecasts emissions based on the travel-related forecasts from both models.

Conformity Approach

The last conformity determination for the Sacramento ozone nonattainment area, CO attainment area and PM₁₀ moderate nonattainment area was adopted by the SACOG Board of Directors on January 1, 2010 and approved by FHWA/FTA on May 12, 2010. (93.114).

The conformity tests for the Sacramento ozone nonattainment, CO attainment and PM₁₀ nonattainment areas consist of a quantitative emissions analysis (budget test for ozone and CO and a build vs no-build test for PM₁₀, as shown in Tables 2 & 3.

The conformity determination for the Sutter Buttes ozone nonattainment area does not require a quantitative regional emissions analysis because the transportation projects and planning assumptions for both the "Build" and "No-build" scenarios for all potential analysis years are exactly the same [93.119 (g) (2)].

Financial Constraint

SACOG is required to demonstrate financial constraint for Amendment #3 to the 2035 Metropolitan Transportation Plan (MTP) and the 2011/14 Metropolitan Transportation Improvement Program (MTIP)—in other words, show that it is reasonable to assume that funds will be available to pay for the projects included in the 2011/14 Metropolitan Transportation Improvement Program (MTIP) and Amendment #3 to the 2035 Metropolitan Transportation Plan (MTP). Approximately \$41.7 billion has been identified that will come to the region to pay for transportation investments between 2008-2035. A summary of how these funds will be spent is shown in chapter 2 of the MTP. Chapter 3 of the MTP includes a discussion (starting on page 3-2) of how the MTP 2035 meets the test of financial constraint: for each year of the MTP, the expected revenue available is equal to or greater than the level of expenditures. Detailed revenue estimates by year are shown in the table in Appendix C of the MTP. Appendix D lists the assumptions behind the revenue estimates that have been developed for the MTP 2035 (93.108).

Inclusion of all Federal and Regionally Significant Projects

Amendment #3 to the 2035 Metropolitan Transportation Plan (MTP) and the 2011/14 Metropolitan Transportation Improvement Program (MTIP) includes all federal and regionally significant projects expected to occur in the nonattainment and maintenance areas as noted in the introduction above (93.106).

Design, Content, and Scope of Projects

The design, content, and scope of projects included in Amendment #3 to the 2035 Metropolitan Transportation Plan (MTP) and the 2010/14 Metropolitan Transportation Improvement Program (MTIP) are included in the attached list showing modeled projects. Information provided on project design and scope

allow adequate representation in the travel model to determine the intersections between regionally significant facilities, route options, travel times, transit ridership and land use.

Latest Planning Assumptions

The emission estimates developed for this conformity determination were based on the latest revised population and employment projections for the Sacramento and Yuba/Sutter areas that were adopted by the SACOG Board of Directors on September 20, 2007. A list of the assumptions used in developing this conformity determination can be found in Table 4. (93.110 a, b).

Land Use Assumptions

The land use development scenarios produced for Amendment #3 to the 2035 Metropolitan Transportation Plan (MTP) and the 2011/14 Metropolitan Transportation Improvement Program (MTIP) and this conformity determination are consistent with the future transportation system alternatives developed. The 2035 land use allocation was developed over two years (2005-2007) in cooperation with local jurisdictions. In 2005, a regional growth forecast of employment, population and households was developed for the SACOG region by Stephen Levy of the Center for the Continuing Study of the California Economy (CCSCE). The SACOG Board of Directors adopted this regional forecast for use in developing the land use allocation of the MTP 2035. This forecast consisted of a projected economic growth rate that was tied to a demographic forecast, which was then tied to a forecast of the number of new housing units that will be needed throughout the region through 2035. The adopted forecast closely matches the 2035 projections released by the California Department of Finance in mid 2007.

Growth rates and patterns within an area are influenced by various local, regional and national forces that reflect ongoing social, economic and technological changes. Ultimately, the amount and location of population growth and economic development that occurs with a specific area is determined by market forces, and regulated by city and county governments through zoning, land use plans and policies and decisions regarding development applications. Local government and other regional, state and federal agencies also make decisions regarding the provision of infrastructure (e.g. transportation facilities, water facilities, sewage facilities) and protection of natural resources that may influence growth rates and the location of future development.

The 28 jurisdictions in the Sacramento Region are at various stages of updating or augmenting their local land use plans. Since the adoption of the Blueprint Vision by the SACOG Board of Directors in December 2004, a number of jurisdictions in the region have begun implementing the Blueprint smart growth principles into their planning processes. The general plan and specific plan development activities occurring in the region by the local jurisdictions, plus anticipated changes to general plans which are currently under consideration and likely to be adopted in the foreseeable future, are reflected in the 2035 land use assumptions that accompany the population, housing and employment forecasts for the MTP 2035.

In developing the MTP 2035 land use allocation, SACOG worked with each of the local jurisdictions to develop a growth forecast and accompanying land use allocation that reflects each of their Blueprint implementation efforts. At the same time, the MTP 2035 land use assumptions must reflect the growth pattern that is most likely to occur, based on the best information available (93.122). The resulting growth

patterns are a combination of local policies, many of which reflect or are influenced by Blueprint principles, and leavened by market forces and issues such as flooding and habitat conservation.

In contrast to the growth projections used for the 2006 MTP, the adopted land use and accompanying housing and employment projections for the MTP 2035 show considerable changes from the traditional approach to development. With many smart growth principles now incorporated, the focus of regional and local land use planning has shifted to more compact development with higher employment and housing densities. However, while more of the project growth occurs in the central core and inner suburbs, a growth pattern which is generally consistent with the Blueprint principles, some outlying communities will experience faster growth than previously projected.

A discussion of the land use allocation at the jurisdictional level is included in Appendix K of the MTP 2035 (93.122 b 1 iii²).

Latest Emissions Model

One of the critical inputs into determining emissions associated with the 2035 MTP is the selection of which emissions factors to use. For purposes of this conformity determination, EMFAC 2007 was used. Quantitative emissions analyses have been prepared for the Sacramento nonattainment, maintenance, and moderate areas, as shown in Tables 2 & 3.

On January 31, 2006, CARB submitted a letter to EPA and to the California Division of the FHWA indicating the State's intention to update future revisions to EMFAC. These EMFAC updates would reflect, among other new information, updated vehicle fleet data every three years. In California, Metropolitan Planning Organizations and Air Districts have not been able to update vehicle fleet data embedded into EMFAC. The EPA/USDOT January 18, 2001, guidance on latest planning assumptions and EPA's July 2004 final rule, indicate that new vehicle registration data must be used when it is available prior to the start of new conformity analyses and that states should update the data at least every five years. The State reaffirmed their commitment to keeping the latest planning assumptions included in EMFAC updated on a three year cycle. EMFAC 2007 was used in this conformity analysis, which was begun on May 18, 2010.

Modeling Documentation

SACOG uses the SACSIM travel demand model. The model was validated in 2007 for the 2005 base year. The latest planning assumptions used in the transportation model validation and conformity analysis is summarized in Table 4.

SACOG's traffic model uses land use inputs (socioeconomic data) by parcel for trip generation. These socioeconomic data are expressed in terms of households and employment, and a representative population file which is consistent with the land use data and reflects the demographic forecasts adopted by the SACOG Board for use in development of the long range transportation plan.

SACOG's SACSIM model consists of four sub-models to account for different types of travel in the region: an activity-based tour sub-model which accounts for all household trips generated within the region, except airport passenger trips; a commercial vehicle sub-model which accounts for all travel by commercial vehicles, including trips by large trucks; an airport passenger ground-access model, which accounts for travel by air passengers to the Sacramento International Airport; and an external travel sub-model, which accounts for all travel within the region by travelers with origins or destinations

outside the region, or travelers through the region. The travel demand estimates from the four submodels are combined to represent total weekday travel demand in the SACOG region.

The highway, transit and bike and walk systems in the SACOG region are represented in detailed link-and-node computer networks. Link types include freeway, freeway ramp, expressway, arterial and collector. Current and future-year road networks were developed from the MTP. The model uses equilibrium, a capacity sensitive assignment methodology, and the data from the model for the emission estimates differentiates between peak and off-peak volumes and speeds. In addition, the model is reasonably sensitive to changes in time and other factors affecting travel choices. The results from model validation/calibration were analyzed for reasonableness and compared to historical trends.

The travel demand model estimates travel demand and traffic volumes for the A.M. three-hour peak period, P.M. three-hour peak period, a five-hour midday period, and a thirteen-hour late evening/early morning. Daily forecasts are calculated by summing the four time periods.

SACOG completed the development of the SACSIM travel demand model and its validation to a new base year of 2005 in 2007. The model was validated by comparing its estimates of peak, off-peak and daily traffic levels to available peak and off peak traffic counts. The 2007 validation meets standard criteria for replicating total traffic volumes on various road types and for percent error on links. The validation also meets standard criteria for percent error relative to traffic counts.

The conformity regulation (93.122 b 3) states that Highway Performance Monitoring System (HPMS) estimates of vehicle miles traveled (VMT) shall be considered the primary measure of VMT within a non-attainment area for the classes of roadways included in HPMS. The regulation also allows locally-developed count-based programs. SACOG uses both HPMS estimates and a database of local traffic counts. Some of the reasons for this are: HPMS is based on average annual daily traffic, while SACOG's models are validated for typical weekday conditions, and many counts exist on non-HPMS segments, and are extremely useful for model validation. HPMS-based estimates of VMT by county are used as a secondary source in validation of SACOG travel demand models.

The model has been extensively tested and validated by SACOG staff. In 2008, the model was the subject of a peer review of independent experts, conducted as part of FHWA's Transportation Model Improvement Program. Documentation of the model's function, validation and sensitivity test results, and results of the independent peer review are available from SACOG. (93.111).

Estimates of regional transportation-related emissions, for serious, severe, or extreme ozone nonattainment areas, that are used to support conformity determinations, must be made in accordance with the procedures laid out in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, Code of Federal Regulations, Part 93, Subpart A. The Sacramento ozone nonattainment area is currently classified as a severe-15 ozone nonattainment area. SACOG's SACSIM Travel Demand model, which was used to develop transportation-related emissions for the Sacramento nonattainment areas, currently meets all the modeling requirements, as set forth in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, Code of Federal Regulations, Part 93, Subpart A. The SACSIM model was used to develop ROG, NOx and CO emissions for the Sacramento ozone nonattainment and carbon monoxide maintenance areas, respectively. The EPA's AP-42 emissions model was used to develop PM₁₀ emissions for the PM₁₀ nonattainment area (Sacramento County only).

Consultation

Review of this document is part of the conformity consultation process as required under section 93.105 (a) (2), 93.105 (c) (1), and 93.105 (e) and is consistent with the public involvement procedures under 23 CFR 450 (93.112). This draft air quality conformity analysis is being circulated for thirty days to give all affected parties an opportunity to comment. The SACOG Board of Directors is scheduled to act on these conformity determinations at its September 10, 2010 meeting. Any comments received by SACOG during the comment period will be included, along with staff's responses, with the final conformity submittal package.

The Regional Planning Partnership (Partnership), a committee established by the SACOG Board of Directors to review all conformity determinations and assumptions, was asked to review and approve a set of assumptions for use in future conformity determinations. Those assumptions have been incorporated into this conformity determination. The Partnership approved the use of assumptions associated with this conformity determination at its May 27, 2009 meeting (See Table 4).

Implementation of Transportation Control Measures

The MTIP/MTP provides for both priority and timely completion/implementation of the TCMs in the applicable air quality plans. Appendix D of the 2009 Sacramento Regional 8-Hour Ozone Attainment and Reasonable Further Progress Plan included 43 transportation control measures for the SACOG Region. Timely implementation documentation on these measures is contained in Appendix D of this document. (§93.113).

Air Quality Emissions Analysis

In order for SACOG to make a conformity determination on Amendment #3 to the 2035 MTP and the 2011/14 MTIP, a quantitative emissions analysis must be performed for the Sacramento air quality planning areas. SACOG has completed a quantitative emissions analysis for Reactive Organic Gases (ROG) and Oxides of Nitrogen (NOx) for the Sacramento ozone nonattainment areas, CO maintenance area, PM₁₀ moderate area, and Sutter Buttes ozone nonattainment area as shown below and in Tables 2 & 3.

Years of Analysis - SACOG prepares estimates of emissions for the Sacramento air quality planning areas for the analysis years described below. Estimates of emissions are prepared in accordance with the conformity regulations found in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, Code of Federal Regulations, Part 93, Subpart A.

The analysis years of 2010, 2011, 2014, 2017, 2018, 2025, and 2035 were chosen for the Sacramento air quality planning areas because 2010 is the first milestone year for PM₁₀ and also represents one of the two milestone years for CO, 2011 is the first analysis year for ozone, 2014 and 2017 represent two milestone years for ozone and 2018 is the new attainment date for ozone and is also a milestone year for CO and PM₁₀. The year 2025 was chosen because it represents a horizon year as specified under section 93.106 (a)(1). The year 2035 is used because it represents the last year of the transportation plan's forecast period and, therefore, is required to be an emission analysis year, as specified under section 93.106 (a)(iv) of the conformity regulation.

Analysis Techniques - The analysis techniques that were used for generating Reactive Organic Gases (ROG), Nitrogen Oxides (NOx), and Carbon Monoxide (CO) emissions for this conformity submittal are documented below. Specifically, SACOG employed its "SACSIM" travel demand model for the Sacramento ozone nonattainment area to generate trips and daily vehicle miles traveled (VMT) for each alternative scenario. The outputs from the SACSIM model were then inputted into a PC-based version of EMFAC2007, which is used to generate emissions.

PM₁₀ Analysis - In addition to the above pollutants analyzed, SACOG also performed a PM₁₀ analysis for the Sacramento PM₁₀ nonattainment area. The methodology employed (AP-42) was provided to SACOG by the EPA. Emission projections of PM₁₀ were made for the years 2010, 2018, 2025 and 2035, as shown in Table 3.

SACRAMENTO EMISSIONS CALCULATIONS

In order to prepare an emissions conformity analysis on Amendment #3 to the 2035 MTP and the 2010/14 MTIP, SACOG prepares estimates of emissions for the Sacramento and Yuba/Sutter air quality planning areas for the following analysis years: 2010, 2011, 2014, 2017, 2018, 2025, and 2035, depending on the pollutant in question. Estimates of emissions are prepared in accordance with the conformity regulations found in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, Code of Federal Regulations, Part 93, Subpart A.

Once the analysis years have been selected, SACOG uses its SACSIM travel demand model to generate daily vehicle miles traveled (VMT) and total trips for each analysis year in question using population and employment assumptions, as shown in Table 1. The outputs from the transportation models are then inputted into a PC-based version of EMFAC2007, which is used to generate emissions.

EMISSION FORECASTS FOR AMENDMENT #3 TO THE 2035 MTP AND THE 2010/14 MTIP FOR THE SACRAMENTO OZONE, CO AND PM-10 AIR QUALITY PLANNING AREAS

1. Emissions Budget Test For Ozone (ROG and NO_x) and Carbon Monoxide (CO)

Under the emissions budget test, all future year ROG and NO_x, emissions associated with Amendment #3 to the 2035 MTP and the 2011/14 MTIP must be equal to or less than the budgets established in the Sacramento Regional Nonattainment Area 8-Hour Ozone State Implementation Plan (SIP) for the Sacramento ozone nonattainment area and for CO emissions less than the CO maintenance budgets established in the 2004 Revision to the California State Implementation Plan for Carbon Monoxide, January 30, 2006. The emissions budgets in the 8-Hour Ozone SIP for 2011, 2014 and 2017 were found adequate by EPA effective August 12, 2009.

As can be seen from Table 2, ROG, NO_x and CO emissions associated with Amendment #3 to the 2035 MTP and the 2011/14 MTIP are indeed less than the budgets contained in the SIPs for the Sacramento nonattainment areas for all future years.

2. Build vs. No-Build Test for PM-10

Under the Build vs. No-Build test for PM-10, PM-10 emissions must either be less in the future when compared against the Base Year or less in “Amendment #3 to the 2035 MTP and the 2011/14 MTIP” (Amendment) vs. “No Amendment #3 to the 2035 MTP and the 2011/14 MTIP”. Table 3 shows that PM-10 emissions are projected to increase significantly in future years. The reason for the increase in PM-10 emissions in the future is because of the methodology used to project PM-10 emissions. We are required to use EPA’s PM-10 forecasting methodology (AP-42), which relies solely on daily VMT. With daily VMT projected to increase significantly in the future, so will PM-10 emissions. However, the conformity test for PM-10 requires that either of two tests be met: either the “Build” results in less emissions than the “No Build” scenario in future years, or the future year emissions are less than the

2005 Base Year levels. In our case, the “MTP” yields less PM-10 emissions in the future than the “No Build” scenario, so one of the tests is met and, therefore, we have met the conformity test for PM-10 for Amendment #3 to the 2035 MTP and the 2011/14 MTIP.

EMISSION FORECASTS FOR THE SUTTER BUTTES OZONE NONATTAINMENT AREA

The Sutter Buttes area is an unusual case. A regional emission analysis under Section 93.122 of the Conformity Regulations is not required for the Sutter Buttes ozone nonattainment area because the transportation projects and planning assumptions for the area would be the same for all analysis years. This is because there are no existing or planned transportation facilities within the Sutter Buttes ozone nonattainment area. The Sutter Buttes ozone nonattainment area is comprised solely of the top of a mountain in Sutter County, and is located entirely on private property with no public access. The air quality monitor placed atop the Buttes registers the area as exceeding Federal ozone standards even though there are no sources of pollutant emissions within the nonattainment area itself.

The conformity determination requirement for the Sutter Buttes has been met without any further emissions analysis because the planning assumptions in both the “Build” and “No-Build” scenarios would be exactly the same for all potential analysis years [93.122(g)(2)], and consequently the emissions predicted in the “Build” scenario are not greater than the emissions predicted in the “No-Build” scenario for all analysis years [93.119 (a)].

Transit

The conformity regulation requires documentation of any changes in transit operating policies and assumed ridership levels since the previous conformity determination. Document the use of the latest transit fares and road and bridge tolls.

Supporting Documentation:

The transit assumptions used in the updated model for the 2011/14 MTIP, 2035 Regional Transportation Plan #3 were reviewed and remain consistent with the six guided 2035 MTP Principles listed below:

1. Smart Land Use: Design a transportation system to support good growth patterns, including increased housing and transportation options, focusing more growth inward and improving the economic viability of rural areas.
2. Environmental Quality and Sustainability: Minimize direct and indirect transportation impacts on the environment for cleaner air and natural resource protection.
3. Financial Stewardship: A transportation system that delivers cost-effective results that are feasible to construct and maintain.
4. Economic Vitality: Efficiently connect people to jobs and get goods to market.
5. Access and Mobility: Improve opportunities for businesses and citizens to easily access goods, jobs, services and housing.
6. Equity and Choice: Provide real, viable travel choices for all people throughout our diverse region.

SACOG maintains a regional travel demand model called "SACSIM" which is used for regional transportation planning and analysis, and for specific statutory analyses such as air quality conformity determinations. The version of SACSIM which is used for conformity analyses includes consistent planning assumptions to those used for development of the SIP and emissions budgets, and the current adopted long range plan and program. The model was peer-reviewed in 2009. SACOG updates planning assumptions (population, employment, costs of travel, roadway networks, and transit services) on a three- or four- year cycle. The last update was prepared for the current adopted long range plan. An update is under way currently for the long range plan scheduled for adoption in 2011. This update will reflect many of the significant changes in the economy which have occurred over the last two or three years.

Public Participation Process

SACOG follows the procedures outlined in the Public Participation Plan for amendments requiring a conformity analysis. Please refer to the public involvement section of the amendment for more details. SACOG's Public Participation Plan (PPP), adopted July 19, 2007 and updated January 2009, outlines the techniques employed by SACOG to help facilitate public participation during the development of the 2035 MTP, and any amendments, and solicitation of projects for the Metropolitan Transportation Improvement Program. SACOG's Public Participation Plan provides for early and continuing participation in our long-range transportation plans, our project-selection or "programming" process (i.e., Federal TIP), and the air-quality "conformity" determination and environmental reviews associated with these plans and programs.

Resolution of Approval for Amendment #3 to the 2035 MTP and the 2011/14 MTIP

A copy of the resolution of adoption finding that Amendment #3 to the 2035 MTP and the 2011/14 MTIP meet federal conformity requirements, is included as Attachment D, for your review and comment. The SACOG Board is scheduled to act on this conformity submittal at its September 10, 2010, meeting.

Conclusions

The results of the emissions analysis show that Amendment #3 to the 2035 MTP and the 2011/14 MTIP meet the emissions conformity tests based on the Transportation Conformity requirements found in the Federal Clean Air Act, Section 176(c) (42 U.S.C. 7506(c)), and Title 40, Code of Federal Regulations, Part 93, Subpart A for both the Sacramento ozone, carbon monoxide and PM-10 air quality planning areas and the Sutter Buttes ozone nonattainment area.

Indicate which emissions budgets have been found adequate by EPA, and which budgets are currently applicable for what analysis years.	8-10	See "Air Quality Emissions Analysis"
§93.110 (a, b)	Document the use of latest planning assumptions (source and year) at the "time the conformity analysis begins," including current and future population, employment, travel and congestion. Document the use of the most recent available vehicle registration data. Document the date upon which the conformity analysis was begun.	5, 6	See "Latest Planning Assumptions", "Latest Emissions Modeling" and Table 4.
USDOT/EPA guidance	Document the use of planning assumptions less than five years old. If unable, include written justification for the use of older data. (1/18/02)	5, 6	See "Latest Planning Assumptions" and "Latest Emissions Modeling"
§93.110 (c,d,e,f)	Document any changes in transit operating policies and assumed ridership levels since the previous conformity determination. Document the use of the latest transit fares and road and bridge tolls. Document the use of the latest information on the effectiveness of TCMs and other SIP measures that have been implemented. Document the key assumptions and show that they were agreed to through Interagency and public consultation.	8, 10	See "Implementation of Transportation Control Measures", "Transit", Appendix D, and Table 4
§93.111	Document the use of the latest emissions model approved by EPA.	7	See "Modeling Documentation".
§93.112	Document fulfillment of the interagency and public consultation requirements outlined in a specific implementation plan according to §51.390 or, if a SIP revision has not been completed, according to §93.105 and 23 CFR 450. Include documentation of consultation	7, 11	See "Consultation" and "Public Participation Process", Appendix G

	on conformity tests and methodologies as well as responses to written comments.		
§93.113	Document timely implementation of all TCMs in approved SIPs. Document that implementation is consistent with schedules in the applicable SIP and document whether anything interferes with timely implementation. Document any delayed TCMs in the applicable SIP and describe the measures being taken to overcome obstacles to implementation.	8	See "Implementation of Transportation Control Measures", Appendix D
§93.114	Document that the conformity analyses performed for the TIP is consistent with the analysis performed for the Plan, in accordance with 23 CFR 450.324(f)(2).	3	See "Introduction"
§93.118 (a, c, e)	<u>For areas with SIP budgets:</u> Document that emissions from the transportation network for each applicable pollutant and precursor, including projects in any associated donut area that are in the Statewide TIP and regionally significant non-Federal projects, are consistent with any adequate or approved motor vehicle emissions budget for all pollutants and precursors in applicable SIPs.		See Tables 1-3
§93.118 (b)	Document for which years consistency with motor vehicle emissions budgets must be shown.	8	See "Air Quality Emissions Analysis"
§93.118 (d)	Document the use of the appropriate analysis years in the regional emissions analysis for areas with SIP budgets, and the analysis results for these years. Document any interpolation performed to meet tests for years in which specific analysis is not required.	8	See "Air Quality Emissions Analysis" and Tables 1-3
§93.119 ¹	<u>For areas without applicable SIP budgets:</u> Document that emissions from the transportation network for each applicable pollutant and precursor, including projects in any associated donut area that are in the Statewide TIP and regionally significant non-Federal projects, are consistent with the requirements of the "Action/Baseline", "Action/1990" and/or "Action/2002" interim emissions tests as applicable.	8	See "Air Quality Emissions Analysis" and Table 3
§93.119 (g)	Document the use of the appropriate analysis years in the regional emissions analysis for areas without applicable SIP budgets.	4	See "Conformity Approach"
§93.119 (h,i)	Document how the baseline and action scenarios are defined for each analysis year.	4, 6	See "Conformity Approach" and "Modeling Documentation"
§93.122 (a)(1)	Document that all regionally significant federal and non-Federal projects in the nonattainment/maintenance area are explicitly modeled in the regional emissions analysis. For each project, identify by which analysis it will be open to traffic. Document that VMT for non-regionally significant Federal projects is accounted for in the regional emissions analysis		See Appendix B, Table 1
§93.122 (a)(2, 3)	Document that only emission reduction credits from TCMs on schedule have been included, or that partial credit has been taken for partially implemented TCMs. Document that the regional emissions analysis only includes emissions credit for projects, programs, or activities that require regulatory action if: the regulatory action has been adopted; the project, program, activity or a written commitment is included in the SIP; EPA has approved an opt-in to the program, EPA has promulgated the program, or the Clean Air Act requires the program (indicate applicable date). Discuss the implementation status of these programs and the associated emissions credit for each analysis year.		See "Implementation of Transportation Control Measures", and Appendix D
§93.122 (a)(4,5,6)	For nonregulatory measures that are not included in the STIP, include written commitments from appropriate agencies. Document that assumptions for measures outside the transportation system		NA

	(e.g. fuels measures) are the same for baseline and action scenarios. Document that factors such as ambient temperature are consistent with those used in the SIP unless modified through interagency consultation.		
§93.122 (b)(1)(i) ²	Document that a network-based travel model is in use that is validated against observed counts for a base year no more than 10 years before the date of the conformity determination. Document that the model results have been analyzed for reasonableness and compared to historical trends and explain any significant differences between past trends and forecasts (for per capita vehicle-trips, VMT, trip lengths mode shares, time of day, etc.).	6	See "Modeling Documentation"
§93.122 (b)(1)(ii) ²	Document the land use, population, employment, and other network-based travel model assumptions.	3-4	See "Background" and Table 1
§93.122 (b)(1)(iii) ²	Document how land use development scenarios are consistent with future transportation system alternatives, and the reasonable distribution of employment and residences for each alternative.	5-6	See "Land Use Assumptions"
§93.122 (b)(1)(iv) ²	Document use of capacity sensitive assignment methodology and emissions estimates based on a methodology that differentiates between peak and off-peak volumes and speeds, and bases speeds on final assigned volumes.	7	See "Modeling Documentation"
§93.122 (b)(1)(v) ²	Document the use of zone-to-zone travel impedances to distribute trips in reasonable agreement with the travel times estimated from final assigned traffic volumes. Where transit is a significant factor, document that zone-to-zone travel impedances used to distribute trips are used to model mode split.	7	See "Modeling Documentation"
§93.122 (b)(1)(vi) ²	Document how travel models are reasonably sensitive to changes in time, cost, and other factors affecting travel choices.	7	See "Modeling Documentation"
§93.122 (b)(2) ²	Document that reasonable methods were used to estimate traffic speeds and delays in a manner sensitive to the estimated volume of travel on each roadway segment represented in the travel model.	7	See "Modeling Documentation"
§93.122 (b)(3) ²	Document the use of HPMS, or a locally developed count-based program or procedures that have been chosen through the consultation process, to reconcile and calibrate the network-based travel model estimates of VMT.	7	See "Modeling Documentation"
§93.122 (d)	In areas not subject to §93.122(b), document the continued use of modeling techniques or the use of appropriate alternative techniques to estimate vehicle miles traveled		NA
§93.122 (e, f)	Document, in areas where a SIP identifies construction-related PM10 or PM 2.5 as significant pollutants, the inclusion of PM10 and/or PM 2.5 construction emissions in the conformity analysis.	8, 9	See "PM10 Analysis", "Sacramento Emissions Analysis"
§93.122 (g)	If appropriate, document that the conformity determination relies on a previous regional emissions analysis and is consistent with that analysis.		NA
§93.126, §93.127, §93.128	Document all projects in the TIP/RTP that are exempt from conformity requirements or exempt from the regional emissions analysis. Indicate the reason for the exemption (Table 2, Table 3, traffic signal synchronization) and that the interagency consultation process found these projects to have no potentially adverse emissions impacts.		See Appendix D

REG18007	Sacramento	Sacramento Regional Transit District	Community Bus Service Study	Complete a service study that will provide guidance for improving the service provided by the Community Bus Division.	\$ 400,000	2010	MTP
REG17991	Sacramento	Sacramento Regional Transit District	Implement Document Archival System	Implement a document archival system that converts financial and engineering documents to an electronic and/or microfilm format.	\$ 224,000	2010	MTP
REG17990	Sacramento	Sacramento Regional Transit District	Upgrading Rail Interlockings (Remote Indication)	Upgrade rail interlocking status and control functions to provide modem connection to Central Train Tracking/Operations Central Control.	\$ 200,078	2010	MTP
YOL19288	Yolo	City of West Sacramento Dept of Public Works	Rail relocation & reconfiguration study	Study rail relocation and reconfiguration through West Sacramento. The intent of the study will be to seek implementing a proposed solution and leveraging public and private funding for implementation.	\$ 500,000	2010	MTP
YOL19249	Yolo	Yolo County Dept of Public Works	County Rd. 99	Road reconstruction and bike lanes: from County Rd. 27 to Woodland city limits.	\$ 2,000,000	2010	MTP
YUB16014	Yuba	City of Wheatland	1st St. Rehab	Rehabilitation: From Hooper to G St.	\$ 260,000	2010	MTP
YUB15878	Yuba	Yuba County Dept of Public Works	Matthews Lane Pavement Rehabilitation Project	Pavement overlay, Woodruff Lane to Ramirez Rd., 3.5 miles	\$ 700,000	2010	MTP
ELD19100	El Dorado	City of Placerville Dept of Public Works	Point View Drive	In the City of Placerville, Point View Drive from Broadway to Smith Flat Road: extend two-lane road.	\$ 3,160,000	2011	MTIP
ELD19331	El Dorado	El Dorado County Dept of Transportation	Bass Lake Rd. Frontage Improvements	Frontage improvements on Bass Lake Rd. constructed by Silver Springs development	\$ 1,576,000	2011	MTP
ELD19333	El Dorado	El Dorado County Dept of Transportation	Metal Beam Guardrail Installation - Various Locations	Construction/reconstruction of metal beam guardrail at various locations throughout the County. Federally funded (HSIP & RSTP) programs.	\$ 1,672,000	2011	MTP
ELD19292	El Dorado	El Dorado County Dept of Transportation	Silva Valley Pkwy Widening - Entrada to US 50	Widen Silva Valley Pkwy (2 to 4 lanes) from Entrada Dr (north of Oak Meadow Elem School) to new future US 50/Silva Valley Pkwy Interchange (see ELD15610); includes adding sidewalks, bike lanes and left-turn storage for school entrance. CIP72370	\$ 2,644,000	2011	MTIP
ELD19211	El Dorado	El Dorado County Dept of Transportation	US 50 HOV Lanes - Phase 1	Phase 1 (El Dorado Hills to Bass Lake Grade) - Add HOV lanes in median of US 50 between El Dorado Hills Blvd/Latrobe Rd and Bass Lake Rd interchanges (PM 0.5 to PM 4.2 eastbound and PM 0.9 to PM 2.9 westbound); includes extension of EB truck climbing lane from Latrobe Rd to base of Bass Lake Grade, median widenings of Clarksville Rd and Bass Lake Rd undercrossings, and replacement of EDH Blvd undercrossings including EB off-ramp. (See ELD19287/CIP53113 for Phase 2A, ELD19290/CIP53122 for Phase 2B and ELD19289/CIP53116 for future unfunded Phase 3 in the MTP). Emission Benefits in kg/day: ROG 27, NOx: 28, PM10 15, CO 303. CIP53110	\$ 43,573,483	2011	MTIP
ELD19293	El Dorado	El Dorado County Dept of Transportation	White Rock Rd Widening - Latrobe to Monte Verde	Widen White Rock Rd (2 lanes undivided to 4 lanes divided) from Post St to Monte Verde Dr; install new traffic signal at White Rock Rd/Windfield Wy; includes curb, gutter, sidewalk and Class II bike lanes. CIP72372	\$ 1,515,200	2011	MTIP
PLA15710	Placer	City of Roseville Dept of Public Works	I-80 Eureka Road On-Ramp Improvements	In Roseville, Eureka Road at I-80: add 4th WB thru lane from 500' E of N. Sunrise to EB I-80 on-ramp, including Miners Ravine Bridge widening, and change existing #1 NB and SB thru lanes at Sunrise/Eureka to left turn lanes. HPP #2399	\$ 9,600,000	2011	MTIP
PLA25319	Placer	City of Roseville Dept of Public Works	Roseville Transit Buses	Replace 4 fixed route buses.	\$ 1,360,000	2011	MTP
PLA25481	Placer	City of Roseville Dept of Public Works	Westside Dr.	New N/S Road in proposed new Creekview Specific Plan west of Fiddymont north of Blue Oaks	\$ 6,000,000	2011	MTP
PLA25182	Placer	Town of Loomis Dept of Public Works	Multi-Modal Parking Facility - Phase 1	Multi-modal parking facility, bus stop & bicycle & pedestrian improvements on approximately 10 acres of Union Pacific property on Horseshoe Bar Road, adjacent to downtown Loomis. Phase 1 includes environmental, engineering & design, property acquisition & initial construction; future phases 2 & 3 cover construction only. Air quality emissions reduction is estimated at 1.0 kg per day.	\$ 2,860,000	2011	MTIP
CAL20370	Sacramento	Caltrans District 3	Elk Grove Intercity Rail Station	In Elk Grove, San Joaquin Rail Corridor, construct 100-space parking lot, 800 foot platform, and passenger shelter area for intercity passenger rail station.	\$ 8,500,000	2011	MTIP
SAC24312	Sacramento	City of Elk Grove	Intelligent Transportation Systems	Purchase fareboxes that integrate with other transit operators. Purchase software and hardware for an automated dispatch, vehicle locator system and other intelligent transportation systems.	\$ 3,000,000	2011	MTP
SAC24552	Sacramento	City of Galt Dept of Public Works	Galt Vehicle Replacement 2011	Vehicle Replacement	\$ 1,171,000	2011	MTP
SAC22990	Sacramento	City of Rancho Cordova	International Drive & Folsom South Canal Bridge	Extend International Drive as a six lane roadway from Kilgore to Sunrise. Includes bicycle and pedestrian facilities and a bridge over Folsom South Canal. (Emission Benefits in kg/day: ROG 0.37, NOx 0.26, PM10 0.1)	\$ 13,322,500	2011	MTIP
SAC24566	Sacramento	Sacramento County Dept of Transportation	Sacramento County Operating Assistance 2011	Operating Assistance	\$ 818,000	2011	MTP
REG17320	Sacramento	Sacramento Regional Transit District	DNA Light Rail Phase 1 (MOS1A)	Final Engineering, Final EIR, Design, and Construct Phase 1 of the Downtown Natomas Airport Light Rail Line. This extends light rail via a single track from Downtown Sacramento to Richards Boulevard, a distance of just over 1.1 miles, but stopping short of a crossing of the American River. The project is projected to be completed for revenue service by the first quarter of 2011, and Measure A Plan of Finance funding is available to complete the project in this time frame. However, SACOG has requested a completion date of 2012, to satisfy State Air Quality Implementation Plan requirements. The adopted RT Short Range Transit Plan (3/10/2008) reflects this project scope.	\$ 43,880,882	2011	MTIP-Measure A
REG17999	Sacramento	Sacramento Regional Transit District	Light Rail Crossing Enhancements	Purchase and install, as needed, a variety of components in the grade crossing mechanisms.	\$ 500,000	2011	MTP
REG18008	Sacramento	Sacramento Regional Transit District	Light Rail Station Shelter Improvement Program	Add and improve light rail station shelters.	\$ 1,050,500	2011	MTP
REG17964	Sacramento	Sacramento Regional Transit District	Light Rail System Enhancements	Implement various improvements to the light rail system including: 1. Metro light rail yard expansion 2. Light Rail Control Center and 3. Communications system upgrades.	\$ 8,500,000	2011	MTP
REG18004	Sacramento	Sacramento Regional Transit District	LR Station Video Surveillance & Recording System	Procure and install distributed security video surveillance and recording systems to 50 Light Rail stations.	\$ 900,000	2011	MTP
REG17975	Sacramento	Sacramento Regional Transit District	Network Backup and Data Archive Upgrade	Upgrade/replace RT s data backup and archive system.	\$ 65,000	2011	MTP
REG17959	Sacramento	Sacramento Regional Transit District	Noise Attenuation Soundwalls	Construct soundwalls at various locations along the light rail system.	\$ 1,717,000	2011	MTP
REG15040	Sacramento	Sacramento Regional Transit District	SRTD Amtrak / Folsom Corridor Light Rail	Folsom Corridor - Downtown Sacramento Folsom - light rail extension (including vehicle purchase). (Local funds are sales leaseback proceeds.)	\$ 261,000,000	2011	MTIP
REG17960	Sacramento	Sacramento Regional Transit District	Traction Power Upgrades	Make improvements to the Folsom line Traction Power (TPS) system that will improve service availability during peak service on the Folsom corridor and improved contingency operation.	\$ 1,754,415	2011	MTP
REG17958	Sacramento	Sacramento Regional Transit District	UTDC Automatic Train Announcement & CCTV Retrofit	Retrofitting the 21 UTDC light rail vehicles to add the following: - Automatic audio and text train announcements. - CCTV surveillance systems.	\$ 1,125,000	2011	MTP
REG18006	Sacramento	Sacramento Regional Transit District	UTDC Fleet Mid-Life Refurbishment	Refurbish the UTDC light rail vehicle fleet at mid-life.	\$ 6,300,000	2011	MTP
REG17979	Sacramento	Sacramento Regional Transit District	Wayfinding Signage	Procure and install Wayfinding signage to light rail stations.	\$ 100,000	2011	MTP

CAL18350	Sutter	Caltrans District 3	SR 99 Widening	Near Yuba City, SR 99, Central Ave. to O'Banion Rd.: widen to 4 lanes with a median.	\$ 44,837,000	2011	MTIP
CAL17350	Sutter	Caltrans District 3	Sutter/Yuba Route 70 Corridor Project	Near Rio Oso - Route 99 to Bear River Bridge, Route 70 Expressway: Construct 4-lane expressway [combined with CAL15722]	\$ 138,030,000	2011	MTIP
SUT18852	Sutter	City of Yuba City Dept of Public Works	Western Parkway / SR-20 Intersection	Construct the new intersection of Western Parkway and SR-20	\$ 3,700,000	2011	MTIP
YOL15160	Yolo	City of West Sacramento Dept of Public Works	Industrial Boulevard Widening	In West Sacramento, Industrial Boulevard from the Palamidessi Bridge at the Barge Canal to Harbor Boulevard: widen from 4 to 6 lanes.	\$ 16,440,000	2011	MTIP
YOL15950	Yolo	City of West Sacramento Dept of Public Works	Lake Washington Blvd.	Lake Washington Blvd.: Widen the Palamidessi Bridge over the barge canal from 4 to 6 lanes.	\$ 10,100,000	2011	MTIP
YOL19223	Yolo	City of West Sacramento Dept of Public Works	Sacramento River Deep Water Ship Channel Deepening	Dredging remainder of 35 miles of 43 mile ship channel an additional 5' to 35' in depth. This 15% increase in channel depth will allow larger ships and thus will increase allowable ship capacity by 40% (from 25,000 tons to 35,000 tons). Ship channel boundaries are from Collinsville (just above Suisun Bay) up to West Sacramento.	\$ 70,000,000	2011	MTIP
YOL15900	Yolo	City of West Sacramento Dept of Public Works	U.S. 50/Jefferson Blvd. Interchange	Jefferson Blvd interchange--expand the ramps and signals from 1 to 2 lanes, add ramp metering and turn lanes, and related street closures.	\$ 26,450,000	2011	MTIP
VAR19214	Yolo	U.S. Fish and Wildlife Service	Mace Bird Reserve Access Road	Construct two-lane road from Mace Blvd. to federally supported Pacific Flyway wildlife area. HPP #867	\$ 1,160,000	2011	MTIP
YUB15975	Yuba	City of Marysville Dept of Public Works	Pavement Rehab.	Pavement Rehabilitation: Reconstruct 3rd St. from E St. to J St. (Project I)	\$ 750,000	2011	MTP
YUB15976	Yuba	City of Marysville Dept of Public Works	Pavement Rehab.	Pavement Rehabilitation: Reconstruct Huston St. from Gengler Wy. to Johnson Ave. (Project II)	\$ 950,000	2011	MTP
YUB15971	Yuba	Yuba County Dept of Public Works	Los Verjeles Rd.	Replace bridge on Los Verjeles Rd. at Honcut Creek.	\$ 2,000,000	2011	MTP
YUB15961	Yuba	Yuba County Dept of Public Works	State Route 70 at Feather River Blvd	Modify traffic signal at SR70 and Feather River Blvd to accommodate 4 lane freeway construction.	\$ 1,000,000	2011	MTIP
ELD19193	El Dorado	El Dorado County Dept of Transportation	US 50/Missouri Flat Rd Interchange - Phase 1B	Interchange Improvements: This is the 2nd of three phases; includes reconfiguration of interchange to 4-lane tight diamond, construction of aux lanes between the interchange and Forni Rd/Western Placerville Dr Interchange; bike/ped facility from Missouri Flat Rd to Placerville Dr/Forni Rd along eastbound portion of US 50 (fed funded with \$5M ARRA-State TE, \$174K ARRA-TE (EDCTC), \$533K/88.53% TCSP earmark (\$69K/11.47% TCSP local match), and \$1.526M future CMAQ allocations to EDCTC); widening and seismic retrofitting of the Weber Creek Bridge #25-005R/L (Caltrans will contribute to El Dorado County \$2.95M of SHOPP - Bridge Preservation State Cash funds in Construction Capital for a portion of this bridge work refer to EA# 03-2E170); construction of new support piers and widening the bridge deck to accommodate widening existing travel lanes, and the addition of shoulders and auxiliary lanes in the EB and WB directions. See ELD15690/CIP71317 for Phase 1A and ELD19295/CIP71346 for Phase 1C. CIP71336	\$ 36,052,850	2012	MTIP
CAL18797	Placer	Caltrans District 3	I-80 HOV Lanes & Aux Lanes Phase 3	Phase 3 of the Operational Improvement Project: On I-80, Construct east and west bound extensions of the HOV (High Occupancy Vehicle) lanes and auxiliary lanes from Miners' Ravine to State Route 65, 1 mile east of the 65/80 Separation. Includes widening of Miners' Ravine Bridge in both directions.	\$ 33,848,000	2012	MTIP
CAL18767	Placer	Caltrans District 3	I-80 Operational Improvements/HOV - Phase 2	In Placer County, near Sacramento, phase 2, west of Sacramento/Placer County line to Miners' Ravine Bridge- Construct eastbound and westbound HOV lanes and auxiliary lanes, with bridge widening and ramp modifications.	\$ 47,576,532	2012	MTIP
CAL18320	Placer	Capitol Corridor Joint Powers Authority	Roseville Third Track	Design & environmental for a third track to improve capacity on the UP mainline between Elvas Tower in Sac County & Roseville Station in Placer County. Extend freight lead track. Construct track and signal improvements. Possible relocation of the Roseville rail station to address conflicting train movements that affect capacity.	\$ 7,280,000	2012	MTIP
PLA25141	Placer	City of Auburn Dept. of Public Works	Auburn Transit - Bus Replacement	Replacement of 2 30' passenger buses for Auburn Transit.	\$ 345,000	2012	MTP
PLA25143	Placer	City of Auburn Dept. of Public Works	Auburn Transit - Bus Shelters	In Auburn, install bus shelters, signage and related amenities.	\$ 125,000	2012	MTP
PLA25222	Placer	City of Auburn Dept. of Public Works	Auburn Transit - O&M (2011-2012)	Operation & maintenance (O&M) costs for Auburn Transit bus service within the City of Auburn.	\$ 964,866	2012	MTP
PLA25144	Placer	City of Auburn Dept. of Public Works	Auburn Transit - On-Board Surveillance	Install on-board surveillance systems on all Auburn Transit buses.	\$ 10,500	2012	MTP
PLA25229	Placer	City of Auburn Dept. of Public Works	Nevada Street Improvements	Various improvements on Nevada Street from Highway 49 to I-80, including widening 2 to 3 lanes, signalization, bike lanes, sidewalks, and bus turnouts.	\$ 225,000	2012	MTIP
PLA19070	Placer	City of Lincoln Dept of Public Works	Ferrari Ranch Rd. at SR 65 Bypass	In Lincoln, SR 65 Lincoln Bypass at Ferrari Ranch Road: construct interchange.	\$ 14,495,628	2012	MTIP
PLA18710	Placer	City of Lincoln Dept of Public Works	Industrial Blvd.	Industrial Blvd., from Route 65 to 12 Bridges Dr.: Widen from 2 to 4 lanes.	\$ 948,000	2012	MTIP
PLA20210	Placer	City of Lincoln Dept of Public Works	Lincoln Transit Buses	In Lincoln, purchase 8 replacement transit buses.	\$ 1,900,000	2012	MTP
PLA19020	Placer	City of Lincoln Dept of Public Works	Twelve Bridges Dr.	Twelve Bridges Dr. from Industrial Blvd. to SR 65 Interchange: widen from 2 to 4 lanes, including interchange improvements.	\$ 230,414	2012	MTIP
PLA25484	Placer	City of Rocklin Division of Engineering	Midas Av.	New: from Pacific St. to Third St.: Construct 2 lane grade separation of UP tracks including ROW	\$ 5,650,000	2012	MTP
PLA25355	Placer	City of Rocklin Division of Engineering	Multi Modal Station Park-n-Ride Lot	In Rocklin, Rocklin Road adjacent to the UPRR tracks: Construct approximately 175 additional spaces, including lighting and landscaping, to the existing parking lot at the existing Rocklin Multi Modal station. (Emission Benefits in kg/day: ROG 0.46, NOx 0.49, PM10 0.38)	\$ 580,000	2012	MTIP
PLA25485	Placer	City of Rocklin Division of Engineering	Whitney Ranch Pkwy.	Whitney Ranch Parkway/Hwy. 65 interchange: Construct full movement interchange.	\$ 20,000,000	2012	MTP
PLA25486	Placer	City of Roseville Dept of Public Works	Blue Oaks	Extend: 4 lanes from 1300' W/O Fiddymont to Hayden Pkwy. and 2 lanes plus center turn lane from Hayden Pkwy. to Westside including 6-lane bridge over Kaseberg Creek.	\$ 9,700,000	2012	MTP
PLA25375	Placer	City of Roseville Dept of Public Works	Blue Oaks Extension	Roseville, Blue Oaks from 1300' west of Fiddymont to Hayden Pkwy., extend as 4 lanes. From Hayden Pkwy. to Westside extend as 2 lanes, including a 6 lane bridge over Kaseberg Creek.	\$ 9,700,000	2012	MTIP
PLA25325	Placer	City of Roseville Dept of Public Works	Park & Ride	To develop and construct a new transfer point that will also include a 75-space park and ride facility.	\$ 7,090,500	2012	MTP
PLA25320	Placer	City of Roseville Dept of Public Works	Roseville Transit Buses	Replace six (6) cutaway buses.	\$ 450,000	2012	MTP
PLA25321	Placer	City of Roseville Dept of Public Works	Roseville Transit Buses	Replace five (5) 40 ft. buses for commuter services.	\$ 1,900,000	2012	MTP
PLA25482	Placer	City of Roseville Dept of Public Works	Westside Dr.	New N/S Road in W. Roseville Specific Plan west of Fiddymont Rd. between Pleasant Grove and Blue Oaks	\$ 3,500,000	2012	MTP

TABLE 4

Summary of Latest Planning Assumptions that were used to develop MTP 2035 and MTIP Conformity Determinations

<p>On May 27, 2009, SACOG's RPP approved a list of assumptions to use in developing the air quality conformity determinations associated with future amendments to the MTP 2035 and the MTIP.</p>	
<p>Assumption 1</p>	<p>The SACOG Board of Directors adopted a new set of population, housing, and employment projections for the years 2013, 2018 and 2035 at its September 20, 2007 meeting to be used for all future conformity determinations. Projections for all other milestone years will be interpolated using the 2013, 2018 and 2035 numbers, plus the base year (2005) datasets.</p>
<p>Assumption 2</p>	<p>EMFAC 2007 will be used to develop emission estimates for the conformity determinations associated with upcoming amendments of the MTP 2035 and the MTIP. The emission budgets used in the conformity determinations are from the new 8-Hour Ozone SIP adopted by the California Air Resources Board (CARB) on March 26, 2009. Official use of these budgets will become final upon the U.S. Environmental Protection Agency's (EPA) making an adequacy finding on the budgets (this action is anticipated by early June 2009).</p>
<p>Assumption 3</p>	<p>SACOG will use the most recent emission control factors supplied by the California Air Resources Board (CARB) for use in any future conformity determinations.</p>
<p>Assumption 4</p>	<p>SACOG will claim emission reduction credits from the implementation of Congestion Mitigation and Air Quality (CMAQ) projects upon proper documentation.</p>
<p>Assumption 5</p>	<p>SACOG will continue to incorporate emission estimates for that part of Solano County within the Sacramento federal ozone nonattainment area in all future conformity determinations as agreed to under SACOG's existing Memorandum of Understanding (MOU) with the Metropolitan Transportation Commission (MTC).</p>
<p>Assumption 6</p>	<p>SACOG will claim emission reduction credits from the implementation of the Sacramento Emergency Clean Air and Transportation (SECAT) program upon proper documentation.</p>

RP-7	SACOG		Implement a Safe Routes to Schools Policy and Implement a Pilot Program	SACOG will adopt a Safe Routes to Schools (SRTS) policy to promote the practice of safe bicycling and walking to and from schools throughout the MTP Plan Area to reduce traffic congestion, improve air quality, and enhance neighborhood safety. SACOG will also obtain federal funds from the Federal Highway Administration through Caltrans to implement at least one SRTS pilot program within the MTP Plan Area.	\$200,000	2012	On Going

Appendix E: Charge of the RPP

SACRAMENTO AREA COUNCIL OF GOVERNMENTS
REGIONAL PLANNING PARTNERSHIP
CHARGE

PURPOSE

The purpose of this Partnership is to assist SACOG with its transportation and air quality planning and programming processes, with an emphasis on technical issues, by providing consultation with a broad range of public and private constituencies. In addition, this partnership will help meet the inter-agency consultation requirements of both the Transportation Equity Act of the 21st Century (TEA-21) and the consultation requirements of the Federal Clean Air Act. Both of these laws require that SACOG provide for early and on-going public participation in our long-range transportation plans, project-selection or programming process, and air quality conformity determinations.

Activities of the Partnership may include, but are not limited to: developing roles and responsibilities for continuing a well-defined inter-agency consultation procedure for reviewing plans, programs, and projects; developing a process for responding to significant comments of involved agencies, individuals, and organizations; selection and adoption of planning assumptions and models; developing procedures for the conduct of transportation-air quality analysis, and for making findings of conformity; information sharing and discussing ideas and proposals that are of importance to SACOG and Partnership member groups.

The Partnership may establish such subcommittees, task forces, or study groups as it deems appropriate to carry out its charge.

MEMBERSHIP

The Partnership membership will consist of representatives from the following organizations:

1. Public Works and planning directors from each jurisdiction within the Sacramento Metropolitan Planning Area.
2. County-level transportation agencies such as the Placer County Transportation Planning Agency (PCTPA), the El Dorado County Transportation Commission (EDCTC), the Yolo County Transportation District (YCTD), and the Sacramento Transportation Authority (STA).
3. Metropolitan Transportation Commission (MTC) and Solano Transportation Authority.
4. Federal Highway Administration-California Division (FHWA), Federal Transit Administration - Region IX (FTA), Environmental Protection Agency - Region IX (EPA), Air Resources Board (ARB), Caltrans - District 3, and the California Highway Patrol - Valley Division.
5. Sacramento Regional Transit District
6. Air districts within the ozone nonattainment area.
7. Sacramento-Yolo Port District.
8. Sacramento County Division of Airports.
9. Transportation Management Associations (TMAs).
10. SACOG's Transit Coordinating Committee.
11. SACOG's Freight Advisory Council.
12. SACOG's Bicycle and Pedestrian Advisory Committee.
13. Environmental advocacy groups.

14. Social equity, disability, and minority advocacy groups.
15. Business/Chamber of Commerce groups.
16. Indian tribes within the SACOG region.
17. Organized labor.

Requests for membership on the Partnership from agencies or organizations not listed will be subject to recommendation by the Partnership and acted upon by the SACOG Board of Directors.

OFFICERS

SACOG staff will preside over the meetings.

VOTING

Recommendations to the Work Program Committee and the SACOG Board will be by consensus. If a full consensus cannot be reached on a recommendation, minority reports will also be forwarded to the Work Program Committee and Board for their consideration.

MEETINGS

The Partnership will hold regularly scheduled meetings. Special meetings may be called, as needed. All meetings will be open to the public. Agendas will be posted in the SACOG lobby as well as on the web page, www.sacog.org.

Appendix F: Resolution of Adoption and Public Notice

**NOTICE OF PUBLIC HEARING
REQUEST FOR COMMENT ON THE DRAFT 2011/14 SACOG MTIP, MTP AMENDMENT #3, AND
ACCOMPANYING AIR QUALITY CONFORMITY**

The Sacramento Area Council of Governments (SACOG) will hold a public hearing to review 2011/14 Metropolitan Transportation Improvement Program (MTIP), Amendment #3 to the Metropolitan Transportation Plan 2035 (MTP) and accompanying air quality conformity. The hearing will be held at 10 a.m., August 26, 2010, during the Transportation Committee meeting at SACOG, 1415 L Street, Suite 300, Sacramento CA. The MTIP is the short-range transportation program for the SACOG region, which includes the counties of Sacramento, Sutter, Yolo, Yuba, and portions of El Dorado and Placer County.

Please comment in writing to the above address or offer testimony in person during the public hearing. Copies will be available online beginning July 30, 2010 at www.sacog.org, or can be requested by e-mailing jcaceres@sacog.org or by calling (916) 340-6218. In addition, copies are available at the SACOG office at the above address. Please direct your written comments to José Luis Cáceres. Written comments are welcome through 5 p.m., August 30, 2010.

This public hearing process is being used to meet the public participation requirements for the Federal Transit Administration's Program of Projects.

SACRAMENTO AREA COUNCIL OF GOVERNMENTS

RESOLUTION NO. 66 – 2010

**APPROVING AMENDMENT #3 TO THE 2035 METROPOLITAN
TRANSPORTATION PLAN (MTP) AND THE 2011/14 METROPOLITAN
TRANSPORTATION IMPROVEMENT PROGRAM (MTIP) AND
CORRESPONDING CONFORMITY ANALYSIS**

WHEREAS, SACOG, as the designated Metropolitan Planning Organization (MPO) for the Sacramento metropolitan planning area as defined by Section 134(c) of the Federal Highway Act, as well as for the Yuba City-Marysville urbanized area; and

WHEREAS, SACOG and the Secretary of Business, Transportation and Housing have executed memoranda of understanding (MOUs) with both the Placer County Transportation Planning Agency (PCTPA) and the El Dorado County Transportation Commission (EDCTC) which establish a framework of representation for how SACOG will carry out its federal MPO responsibilities in both El Dorado and Placer counties in cooperation and coordination with the agencies and jurisdictions in those areas within the ozone nonattainment area; and

WHEREAS, federal planning regulations require SACOG as a Metropolitan Planning Organization to prepare and adopt a long range Metropolitan Transportation Plan (MTP) for the region; and

WHEREAS, federal planning regulations require SACOG as a Metropolitan Planning Organization to prepare and adopt Metropolitan Transportation Improvement Program (MTIP) for the region; and

WHEREAS, the 2011/14 MTIP has been prepared to comply with Federal and State requirements for local projects; and

WHEREAS, these documents been developed and reviewed through the public participation process defined in SACOG's Public Participation Plan; and

WHEREAS, the 2011/14 MTIP is consistent with: (1) the 2035 MTP Amendment #3; (2) the 2010 State Transportation Improvement Program; and (3) the Corresponding Conformity Analysis; and

WHEREAS, the 2011/14 MTIP contains the MPO's certification of the transportation planning process assuring that all federal requirements have been fulfilled; and

WHEREAS, the 2011/14 MTIP meets all applicable transportation planning requirements per 23 CFR Part 450; and

WHEREAS, the projects submitted in the 2011 MTIP must be financially constrained and the financial plan affirms that funding is available; and

WHEREAS, the 2035 MTP Amendment #3 and the 2011/14 MTIP includes a new Conformity Analysis; and

WHEREAS, SACOG must demonstrate conformity per 40 CFR Part 93 for the MTP and MTIP; and

WHEREAS, the 2035 MTP Amendment #3 and the 2011/14 MTIP do not interfere with the timely implementation of the Transportation Control Measures; and

WHEREAS, the 2035 MTP through Amendment #3 and the 2011/14 MTIP conform to the applicable SIPS; and

WHEREAS, the documents have been widely circulated and reviewed by SACOG advisory committees representing the technical and management staffs of the member agencies; representatives of other governmental agencies, including State and Federal; representative of special interest groups; representatives of the private business sector; and residents of the SACOG region consistent with the public participation process adopted by SACOG; and

WHEREAS, a public hearing was conducted on August 26, 2010 to hear and consider comments on the 2035 MTP Amendment #3, 2011/14 MTIP, and Corresponding Conformity Analysis

NOW, THEREFORE, BE IT RESOLVED, that SACOG adopts the 2035 MTP Amendment #3, 2011/14 MTIP, and Corresponding Conformity Analysis.

BE IT FURTHER RESOLVED, that SACOG finds that the 2035 MTP Amendment #3 and 2011/14 MTIP are in conformity with the requirements of the Federal Clean Air Act Amendments and applicable State Implementation Plans for air quality.

BE IT FURTHER RESOLVED, that SACOG staff is hereby directed and authorized to work with the California Department of Transportation, the Federal Highway Administration, the Federal Transit Administration, and the Environmental Protection Agency to make whatever technical changes or corrections are needed to the content, format and organization of the document to obtain its approval by these agencies.

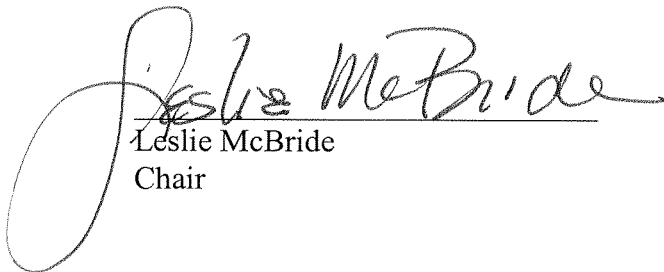

PASSED AND ADOPTED, this 9th day of September 2010 by the following vote of the Board of Directors:

Notice of Public Hearing

Request for Comment on the Draft 2011/14 SACOG MTIP, MTP Amendment #3, and Accompanying Air Quality Conformity

The Sacramento Area Council of Governments (SACOG) will hold a public hearing to review 2011/14 Metropolitan Transportation Improvement Program (MTIP), Amendment #3 to the Metropolitan Transportation Plan 2035 (MTP) and accompanying air quality conformity. The hearing will be held at 10 a.m., August 26, 2010, during the Transportation Committee meeting at SACOG, 1415 L Street, Suite 300, Sacramento CA. The MTIP is the short-range transportation program for the SACOG region, which includes the counties of Sacramento, Sutter, Yolo, Yuba, and portions of El Dorado and Placer County.

Please comment in writing to the above address or offer testimony in person during the public hearing. Copies will be available online beginning July 30, 2010 at www.sacog.org, or can be requested by e-mailing jcaceres@sacog.org or by calling (916) 340-6218. In addition, copies are available at the SACOG office at the above address. Please direct your written comments to José Luis Cáceres. Written comments are welcome through 5 p.m., August 30, 2010.

*****The public comment period has been extended to 9:00 a.m. September 9, 2010 to allow additional review time for the 8/17/10 Revised Draft Air Quality Conformity Analysis. Revisions to this draft have been highlighted in blue.*****

This public hearing process is being used to meet the public participation requirements for the Federal Transit Administration's Program of Projects.

The final version of this document contains a modified Table 1. The population and employment changes that were made in Table 1 of the conformity determination are to correct an error in how that data was tabulated. Previously the data that was reported was for the entire 6-county SACOG region, which is not the same as the ozone non-attainment area. The revised data corrects this geographical error.
