

# Congestion Management Process (CMP)

# Overview

- Congestion Management Process (CMP)
  - Background
  - What is CMP?
  - The process
  - Transit and CMP

# Background

- Required under federal law
- Develop a formal CMP

# What is CMP

- Systematic approach
  - Define
  - Measure
  - Manage
  - Monitor

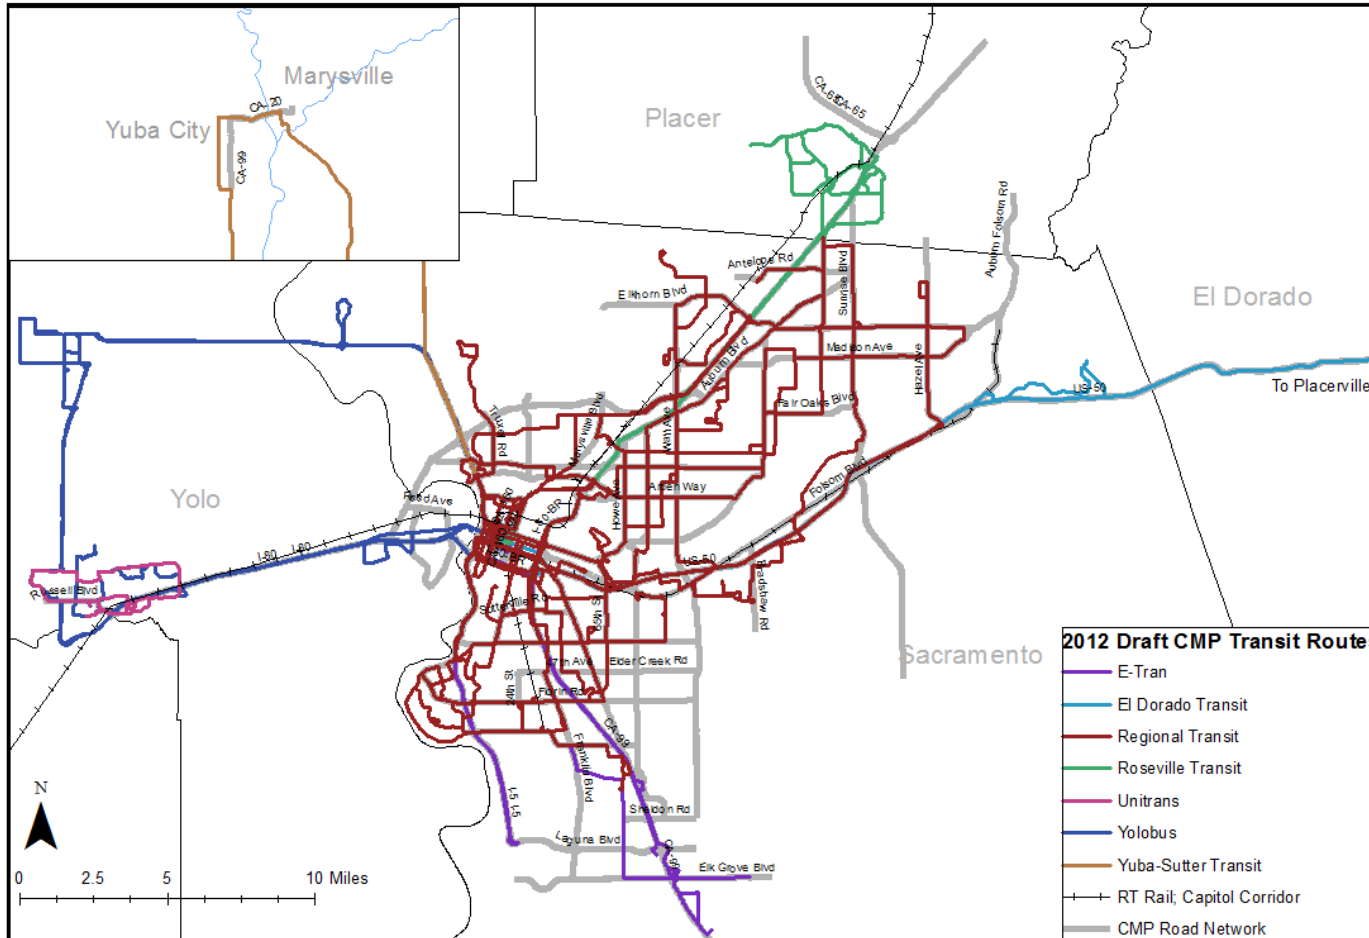

# The Process

- Form working group
  - Develop Objectives
  - Establish CMP Network
  - Identify Performance Measures
  - Identify and Analyze Strategies
- Due by June 2017

# Transit in CMP

- Identify priority transit routes in CMP network
- Draft selection criteria:
  - Local service
    - Average weekday boardings > 1,000
    - Route on or near the CMP road network
  - Commuter/Express
    - Boardings > 20 (about half full)
    - Route on or near the CMP road network
  - All passenger rail service included

# CMP Objectives

1. Improve travel time reliability
2. Reduce congestion delay
3. Promote development that encourages other modes of transportation.
4. Support Transportation Demand Management programs, to offer alternative choices to driving alone
5. **Prioritize transit investments that result in an effective transit system that serves both transit-dependent and choice riders**

# Proposed CMP Transit Performance Metrics

- Weekday transit boardings by route for CMP priority transit routes
- Transit route miles on congested roadways
- Transit route miles on unreliable roadways
