

SACOG has prepared PL-94-171 Redistricting data extracts for use by those involved in the redistricting process. These files do not contain the exhaustive race/ethnicity/Hispanic origin tables that are available in the PL-94-171. The complete data is available but must be processed in order to use at: [http://www.census.gov/rdo/data/2010\\_census.html](http://www.census.gov/rdo/data/2010_census.html) .

These files are available in an Excel and a .shp file format for use with a variety of database, spreadsheet and GIS programs. The files contain 27 fields of data – 6 descriptor fields and 21 data fields. The files provided by the Bureau have 83 fields in the geography file and 291 fields split between the two data files. We hope you find these 21 the most useful.

Please note that those persons choosing “Hispanic or Latino” are only counted in the “Hispanic or Latino” category in these tables, they are not counted in any of the other categories.
