

Contents

- Chapter 1: The Promise and Peril of 2040 6**
 - The Sacramento region needs to be bold and intentional in its planning to ensure success in a rapidly arriving future.....6
 - Our optimistic vision is not risk-free.....9
- Chapter 2: What is the MTP/SCS? 10**
 - A transportation and land use strategy to support an economically prosperous region10
 - Who is SACOG?.....10
 - The MTP/SCS must address state and federal requirements.....12
- Chapter 3: The Sacramento region in the year 2040..... 15**
 - What is the future we’re planning for? People, places, and travel in the year 204015
 - PEOPLE.....15
 - The region’s economy and population will continue to grow.15
 - Our population will be older than in 2020.16
 - We will continue to become more ethnically and racially diverse.....16
 - This older, more diverse population will have different housing needs and desires than today’s population.17
 - The region will have more jobs, more diversity of industries, and less reliance on the government sector.19
 - PLACES20
 - The region will have to develop more compactly over the next 20 years.20
 - TRAVEL.....21
 - People will have better access to jobs, make shorter trips, and more options to avoid heavy congestion.21
 - The region will have a safer transportation system that’s in better shape.21
 - The region will have cleaner air.....22
 - What will we have done to get to our brighter future?23
 - PEOPLE.....23
 - To ensure better opportunities for workers, we will support growth in these tradable industries — agriculture, food, manufacturing, life sciences, and innovative mobility.23
 - We will ensure everyone benefits from the expanded range of travel options.....24

PLACES	25
The public and private sectors will work in partnership to build more types of housing for today’s and tomorrow’s households.....	25
Regional growth will be focused on existing cities and suburbs.	27
We will have re-imagined and revitalized the region’s commercial corridors.	30
We will have invested in rural economies and smaller towns and connected our vital natural resource economy to its urban markets.....	31
TRAVEL.....	32
To support the region’s growth, we will invest \$35 billion in our transportation system in the next 20 years. But we need to be strategic in how we spend our transportation money.	32
Maintaining our transportation system is critical to our success.	34
We will have provided more transportation options and innovative mobility solutions.	39
We will have become a test-bed for new mobility solutions and autonomous, electric vehicles.	45
Chapter 4: Policies and Implementation Actions	49
Ensuring a prosperous future with clean air, housing choice, transportation options, and access to opportunity begins with actions that we can take today	49
1. Build vibrant places for today’s and tomorrow’s residents.....	49
2. Foster the next generation of mobility solutions	51
3. Modernize the way we pay for transportation infrastructure	53
4. Build and maintain a safe, resilient, and multimodal transportation system	55
Tracking Implementation Progress.....	57
