

INTRODUCING:

FREE WALKSACRAMENTO HEALTHY COMMUNITIES DESIGN/OUTREACH TECHNICAL ASSISTANCE

WALKSacramento and Design 4 Active Sacramento are announcing a free project-based technical assistance program geared toward Active Design and innovative approaches to community engagement

Program Goals

Increase connections between public health and land use/ transportation planning

Create space for meaningful community input early on in project development

WALKSacramento is offering in-depth project level guidance to local jurisdictions, agencies, and community organizations geared toward a health and the built environment approach to community-based planning.

We will work with partners to identify projects, implement successful engagement strategies, and design healthier projects through incorporation of local health data and Active Design best practices.

Technical Assistance Services Include:

- Relationship building with public health departments
- Innovative approaches to community engagement:
 - Pop-up workshops
 - Tactical urbanism demonstrations
 - Charrettes
 - Interactive project websites
- Community Walk/Bike/CPTED audits
- Reports summarizing the community-based planning process
